

# Best Grand Prairie Pest Control Welcomes a New Employee

*September 08, 2020*

September 08, 2020 - PRESSADVANTAGE -

Best Grand Prairie Pest Control has been providing quality pest control service to the residents of Dallas County for over two decades. The company has been battling all species of pests in both residential and commercial properties. They have helped tens of thousands of families and business owners over the years and plan on helping thousands more into the future. The company boasts a team of fourteen highly qualified pest technicians that can treat any pest infestation in the area. The exterminators are professionally trained and are prepared for any infestation they might face. Their services are quick, effective, and affordable and they have a lot of high star customer reviews to show for it.

The company is constantly trying to grow. They have more than doubled their service area and team size over the years and plan to continue growing at an even faster rate into the future. They want to help as many people fix their pest control problems as possible. The company recently introduced a new employee to further help more people than ever before.

The head of human resources for the company welcomed the new employee in a recent meeting, "As you all probably know we have been looking for a new pest exterminator for some time but because we only hire the best of the best, it has taken longer than expected. Well we finally found the perfect candidate. Please help me welcome Frederick Capri to the team. Frederick has been in the pest control business for over fifteen years and has experience with treating every pest that is local to the area; plus more. He has a Bachelor's Degree in Pest Control through Pest Management University. He is a fast learner and has a great work ethic. He loves helping people and is really good at fixing things. I know he is going to be a great addition to the team and I know he is going to help us take good care of our community."

Recently, Best Grand Prairie Pest Control noticed a large increase in the number of new pest infestations in the area. They think this is due to the pests becoming resilient to everyday treatments like do it yourself methods and over the counter products. These products include pest sprays and pest traps.

An employee of the company recently said, "Pests are very adaptable creatures. We think that the reason

there have been so many new infestations is partly due to the fact that pests are becoming immune to everyday treatments. This means pests are able to multiply and spread out of control because most people use these ineffective methods.?

The company is highly trusted in the community so if you have a pest problem on your property be sure to give them a try. You can contact them by phone or go to their website at <http://bestgrandprairiepestcontrol.com/>. They are open from 8 a.m. to 5 p.m. on weekdays and from 9 a.m. to 1 p.m. on Saturdays. They remain closed on Sundays. A representative of the company said, ?If you think you have a pest infestation, do not hesitate to call a professional. Pests spread extremely quickly and can take over an entire property overnight. If you need any help or have any questions we would be happy to take your call.?
