

# New Staff at Euless Pest Control & Exterminator

*September 08, 2020*

September 08, 2020 -

Euless Pest Control & Exterminator has been providing professional pest control to Tarrant County residents for over five years now. The company has grown like crazy in the past five years. Their services are highly rated and are trusted by the community as being the most reliable in the area. Their team of pest exterminators have all been trained professionally on how to treat any species of pest local to the area. They are prepared for any kind of pest infestation possible.

The company recently announced the hiring of two new employees to the team. The president of Euless Pest Control & Exterminator said in a recent company meeting, "As a final announcement I would like to announce that we are hiring two new, bright exterminators to the team. Please help me welcome Zach Utmost and Bill Jennings to the team. Zach has been in pest control for over ten years and has a lot of experience at treating every pest in the area. He has a great work ethic and is a quick problem solver. Bill has been in pest control for twenty five years. He knows how to treat just about any pest out there. He has a ton of experience to bring and loves helping people. I believe they are going to be great additions to the team and are going to help us better take care of our community."

The company has a wide variety of different services that they offer. Their most popular service is their custom treatments. Each treatment is specifically designed to treat the individual pest it is meant to target. The company doesn't believe in generalized treatments or the "one size fits all" approach. They say that these custom treatments allow the company to guarantee the most reliable and long lasting protection over any other pest control area in the area while also keeping it just as affordable.

Their routine checkups are great because they prevent pest problems before they ever happen. "Why wait for a pest infestation to happen and then try to fix it when you can prevent the infestation to ever happen in the first place," said a representative of the company. Customers can schedule routine checkups once a month, quarterly, biannually, and annually. Their exterminators will go to the target property and take all of the prevention steps to make sure pests have no chance of invading the property. Their emergency response service is useful for when customers get caught up in a dangerous situation with a wild or distressed animal or bees and wasps. They respond promptly and help take care of the situation in the safest way possible.

The company has received a lot of great reviews so if anyone thinks they have a pest infestation, they will be satisfied with Euless Pest Control & Exterminator. They can be contacted by phone or on their website at <http://eulesspestcontrol.net/>. Their hours are 8 a.m. to 5 p.m. on weekdays and 9 a.m. to 1 p.m. on Saturdays.

An employee of the company said, "Don't wait to call a professional if you think you have a pest problem. They spread very quickly so even if you only see one there are probably more nearby."
