

Merger Announcement at McKinney Pest Control & Exterminator

September 08, 2020

September 08, 2020 - PRESSADVANTAGE -

McKinney Pest Control & Exterminator has been providing Collin County residents and business owners with a wide variety of pest control services for over fifteen years. They have a team of ten exterminators who have all been professionally trained on how to treat every pest in the area. Their services are top rated in the area and are recommended by most residents who have had pest problems in the past.

McKinney Pest Control & Exterminator recently announced that they will be merging with another unnamed company. The company has grown immensely in the past year because of how many new pest infestations are occurring. The president of the company explained more about the merger, "We will be merging with a, for the time being, unnamed pest control company. They are a local pest control company that is choosing to stay unnamed until the merger documents are signed. The merger states that the unnamed company will give us brand new pest control equipment along with two new employees. The new equipment will allow the team to more reliably take care of any pest infestation they are challenged with. The new employees both have a lot of experience in pest control. They are both hard workers and love to help people. We will be throwing them a welcome party when they start, after the merger documents are signed."

The company has noticed a large number of new pest infestations recently. The company believes the main reason for this is because pests are adapting and becoming immune to everyday treatment methods like diy and over the counter products. A representative of the company said, "We have noticed this increase in infestations and believe the reason is that pests have now become almost immune to most over the counter products. Unfortunately, most people use these methods so the pests have been able to multiply and spread without any trouble. Professional pest control services are becoming the only option for treating infestations and are already by far the most reliable."

If someone thinks they have a pest infestation they shouldn't hesitate to call McKinney Pest Control & Exterminator today. The company can be contacted by phone or on their website at <http://gomckinneypestcontrol.com/>. They are open from 8 a.m. to 5 p.m. on weekdays and from 8 a.m. to 12 p.m. on Saturdays. They are closed on Sundays.

An employee of the company recently said, "Pests can take over an entire property virtually overnight. If you think you have a pest problem don't wait to call us for help. We would be happy to answer any questions you might have and possibly set up a time to come take a look at your property and test for pests."
