

Pest Control of Arlington Hires Two New Employees

September 08, 2020

September 08, 2020 - PRESSADVANTAGE -

Pest Control of Arlington has been providing professional pest control to Tarrant County for over twenty years. The company offers three major types of services: custom pest treatments, routine property checkups, and emergency responses. The custom services are their most popular and each treatment is specifically designed for the individual species it targets.

The routine checkups guarantee that pests have no way of getting into the target property into the future. This stops infestations from ever happening rather than waiting for them to happen and then try to treat the pests. The emergency responses are helpful for when people come face to face with a dangerous pest or wild animal.

The company has been growing substantially and plans to continue this incredible growth well into the future. They recently announced that they are hiring two new employees, Seth Remly and Willow Sietz. The president of the company talked more about the new employees in his recent announcement, "Seth has a great work ethic and amazing can-do attitude. He has been in the pest control industry for over twelve years and has experience with treating every pest local to this area. Willow has been in the pest control industry for five years now and also knows how to treat every species of pest in the industry. I am glad to be able to welcome them to the team and I know they are going to do a great job at helping our community stay as pest free as possible."

Pest Control of Arlington also announced that they have noticed a recent surge in the number of pest infestation in the area. A representative remarks on why this is happening, "We are certain this is happening because everyday treatments are working like they used to. DIY methods and over the counter products like pest sprays and traps aren't very effective anymore. The reason for this is because the pests have grown immune to these types of treatments. Sadly, most people use these treatments so the pests are able to multiply and spread mostly unharmed."

The company has a lot of really good reviews so if local residents have a pest problem they should try giving them a chance. Pest Control of Arlington can be contacted by phone or on their website at pestcontrolarlingontx.net. An employee of the company recently said, "Pests spread very quickly so if you think you might have an infestation in your building, don't hesitate to call us for help. We give free consultations and can answer any questions you have."
