

## **Salt Lake City Bio Hazard Cleanup Performed By Bio Clean of Utah**

*October 04, 2019*

October 04, 2019 - PRESSADVANTAGE -

Bio Clean of Utah, based in Centerville, Utah, has announced that they have recently completed a bio-hazard cleanup job in Salt Lake City, Utah. The Salt Lake City bio-hazard cleanup job was requested by a car dealership who had received a 2017 Ford Fusion. The reason was that the owner had died while inside the car, although no foul play or violence was involved. The cause of death is unknown and body fluids had to be cleaned from the car, thus a full bio-hazard cleaning was performed at a cost of \$500.

Daryl Olsen, president of Bio Clean of Utah, says, "It was really a simple bio-hazard cleanup job. Nevertheless, it was a job that required the skills and knowledge of our team of professionals when handling bio-hazardous substances. Body fluids may contain life-threatening risks and OSHA forbids cleanup of such scenes by untrained personnel. Fortunately, we have the trained professionals to perform such cleanups."

Daryl points out that as an aftermath of a trauma scene, property owners are left on their own. The police, fire department, medical examiner's office, or EMTs do not clean up a crime or trauma scene after they have done their work. That is because they neither have the expertise nor the time to do it. People who might want to do the cleanup themselves are at risk of life-threatening diseases and the government even has strict

regulations regarding bio-hazardous waste.

This is where Bio Clean of Utah comes into the picture. They are ready to help property owners in such difficult situations. They can offer their services whether the case involves a suicide, crime scene, trauma scene, an accident, unattended death, or an unsanitary dwelling. Due to the nature of such situations, the cleanup tasks should not be handled by untrained people. Improper handling of such situations can result into psychological or emotional stress and possible contamination by infectious waste. Any kind of exposure to blood or body fluids is considered to be a bio-hazard risk.

Bio Clean of Utah professionals are trained and prepared to handle those kinds of situations, discreetly and professionally. It should also be noted that most cleanups can be reimbursed by insurance. Professional specialized cleaning crews can make sure that all necessary safety measures have been taken.

Bio Clean of Utah is a damage restoration company that provides other services aside from blood & crime scene cleanup. These include air duct cleaning, fire & smoke damage cleanup, mold inspection, mold removal, mold testing, and water damage cleanup.

The company has been providing air duct leaning services for more than 15 years. It is often the case that people forget or are not aware that their air ducts are accumulating dirt, dust, pollen, debris, hair, dander, and other unwanted air contaminants. This accumulation represents a health risk for building occupants and the only way to avoid this is to have the air ducts cleaned regularly. Aside from boosting indoor air quality in the home or building, the efficiency of the heating and cooling system will even be improved after an air duct cleanup.

Another important service provided by Bio Clean of Utah is fire and smoke damage cleanup. Fire damage has to be addressed immediately as it represents a very serious situation. And aside from fire damage, there will also be water damage and smoke soot damage. First of all, the property must be secured. Board up services can be provided for properties with fire damage and these services are available 24/7.

Second, the type of smoke must be determined. This can be dry smoke, wet smoke, protein, fuel oil soot, and other types. It is only after determining the type of smoke that the most effective cleanup and restoration process can be started. For example, highly acidic smoke soot will have to be neutralized to prevent permanent damage.

Bio Clean of Utah is proud to be a recipient of the 2018 Expertise Award for Best Damage Restoration Companies in Salt Lake City, and they are also among the top 10 choices for 2019. Those who need more

information regarding the bio-hazard cleanup services for Salt Lake City and neighboring areas can check out the company website, or contact them on the phone or through email.
