

Keenhealth Nasal Wash Bottle Promises To Relieve Each Customer's Stuffy Nose

October 07, 2019

October 07, 2019 - PRESSADVANTAGE -

Keenhealth, a professional healthcare product manufacturer based in Denver, Colorado, is pleased to announce the availability of their new product, the K-NW-237 Nose Wash Bottle. The company is dedicated to providing top quality healthcare products and has a line of other items that include digital thermometers, baby thermometers, anti-snoring strips, and pregnancy belts.

The nasal irrigation process, often called nasal lavage or nasal douche, is a personal hygiene practice in which the nasal cavity is washed with a saltwater mix to flush out mucus and debris from the nose and sinuses. It is intended to relieve issues related to nasal congestion and reduce allergies. Keenhealth's brand new product is intended to make this task much easier.

Lily, a representative for Keenhealth, says, "Having a stuffy nose is, you'll no doubt agree, a very unpleasant experience. Thankfully, you do have a solution. Just one sinus rinse a day can give you the relief you're looking for. Nasal hygiene is extremely important when you struggle with nasal congestion, and we developed our K-NW-237 Nasal Wash Bottle with that in mind. Our product will help you optimize your nasal health and hygiene and, subsequently, keep your nose happy, healthy and hygienic. This means you can

breathe more easily and freely.?

The K-NW-237 Nasal Wash Bottle is designed to be very simple to use, utilizing an easy valve system to transport the saline mixture from the bottle into one's nose. The product is also packaged with two different sized nozzles, so that both adults and children can use the nasal wash bottle without any issues. Further, Keenhealth has included 30 sachets of saline mix with every box of the K-NW-237 so that customers can easily make their own saline mixture. Lily says, "We want to help make your use of this product as convenient as possible, which is why we've included some of our own saline mix. The pure ingredients used in our saline mix will definitely reduce the hassle of your nasal irrigation. We can also assure you that the product is friendly to both you and your children's nose and sinuses."

Lily says, "We all know the challenges life throws at us every now and again. It might be a sports injury or a snoring hubby who keeps you awake at night, or you might have reduced mobility thanks to your pregnancy. These challenges may seem like unsurpassable obstacles to you at times but that doesn't have to be the case! With the right tools, you're more often than not able to do much more than expected. At Keenhealth, we're determined to not let these limitations rule your life. We know how valuable your freedom is to you, which is why we're eager to deliver products that make your everyday life easy again. This is also why our motto is "easily ever after."?"

All of the company's products are designed to help make day to day life easier when someone is facing a medical issue, with one of their most popular products being their K-MB-756 Maternity Belt—designed to support expecting mothers' growing baby bumps and reduce lower back pain. The product is designed to be adjustable so that it can expand with the growing belly and can be cleaned in three steps, and be ready for use again after 15 minutes of drying. Another popular Keenhealth product is their K-NS-356 Anti-Snoring Strips, which can provide nasal relief for congestion caused by a cold or allergies. It can also reduce snoring.

"We're there to make your life easily ever after," confirms Lily. "And we welcome any and all questions you may have about our products. We welcome feedback too, so we can improve both our products and services. If you want to get in touch with us, you can do so via the form on our website."

Those who wish to learn more about Keenhealth and their line of health products may visit the company's website for more information. All of Keenhealth's products are also available on Amazon, and the K-NW-237 in particular can be found at the following link: [Nasal Irrigation System](#). Interested parties are also welcome to get in touch with Lily directly for further details.
