October 09, 2019 -
Kearny, New Jersey based personal injury attorney Brady Brady & Reilly, LLC is pleased to announce that they provide legal services for victims of auto accidents. The firm has been serving the New Jersey community since 1965, and has subsequently gained a wealth of experience that spans a variety of case types, including workers? compensation, construction accidents, premises liability, personal injury and, of course, motor vehicle accidents.

Lawrence P. Brady, Jr., a representative for Brady Brady & Reilly, LLC, says, ?It?s an unfortunate fact, but the truth is this: more than 270,000 motor vehicle accidents occur on roadways throughout New Jersey every year. Sadly, many of these accidents result in serious and life-altering injuries that deeply affect the persons involved. Car accidents, by their very nature, often occur suddenly and without warning, and, sometimes, they cannot be prevented, no matter how hard you try.?

He continues, ?If you were injured in a motor vehicle accident and it was due to no fault of your own, you deserve reliable representation that can help you collect the compensation you deserve. This will then enable you to cover the costs incurred from your accident and support your ongoing recovery. At Brady Brady & Reilly, LLC, we have helped injured victims get the justice and compensation they deserve for their injuries?and we?ve been accomplishing this goal for over five decades.?

The firm reassures clients that their skilled and knowledgeable auto accident attorneys are able to help them get the financial compensation they need. As Brady Jr. explains, some of the most commonly sought after damages following an auto accident include compensation to cover medical bills, pain and suffering, property damage, lost wages, lost earning potential (when victims are forced out of work indefinitely), and punitive damages.

According to the firm, a variety of factors will be used to determine which party bears the liability for the auto

accident in question. If, for example, the accident was caused by a defective vehicle part, the liability for the accident will be on the manufacturer because nothing the driver could have done could have prevented the crash. Similarly, if the accident was due to unsafe driving conditions, the liability will likely fall squarely on the government. Conversely, if the driver is under the influence of drugs or alcohol, or was otherwise driving recklessly, they will bear all the liability. More information on this topic can be found at the firm?s website.

Brady Jr. adds, ?At Brady Brady & Reilly, LLC, we have the resources necessary to take on the most complex cases. What makes us stand out, however, is this: we make sure we offer each and every one of our clients personalized representation.?
