

# Top Fremont Tree Service Provider Acknowledges Community Support

*October 21, 2019*

October 21, 2019 - PRESSADVANTAGE -

Fremont, CA based Fremont Arborist Tree Services is pleased to express their gratitude to their community for their ongoing support. In light of evolving trends, the company is taking new measures to improve the services they offer, and openly inviting customers to visit their online platforms and social media channels to leave their own feedback regarding their experience with the tree service provider.

"Our customers frequently offer praise for any tree service in Fremont they receive," says Fremont Arborist Tree Services. "However, these comments are rarely shared with other customers online." While the company currently relies heavily on word of mouth to reach new customers, they acknowledge that more and more people are beginning to stumble upon the company through other means.

They state that, "The vast majority of our customers are happy to refer us to friends, or even friends of friends, over the phone or in person. This has worked well for us in the past but we have no trouble admitting that it may eventually not be enough. The world is becoming a far more interconnected one, and the only way to truly succeed in the future is to firmly take advantage of everything it has to offer."

To this end, the company asserts that they have been taking several measures to widen their digital footprint. As an example, they share that, "Most recently, we updated our website to ensure that it can be accessed by any device. Many users browse the internet through their mobile devices, so we've made sure that our online materials can always be accessed as per Google's standards and recommendations." Additionally, the website has also been updated with the company's newer services, alongside a few other resources that customers may find useful if they find themselves in need of a tree service provider. Find the Fremont Arborist Tree Services website at the following link: <http://www.fremont-tree-services.com/>.

As part of their online program, the company maintains a Facebook and Twitter account that customers may reach them through. Fremont Arborist Tree Services states that the vast majority of their customers currently prefer to reach out to them over the phone or through their email; however, they are always ready to respond to Fremont residents and businesses who prefer to explore their tree service options through their favourite

social media platforms.

“A large part of the success of our operation is due to ensuring that it is as convenient as possible for customers to get in touch with us,” says the company. “Given that the average homeowner, is not an expert in trees like we are, they don’t always know what services they need. This leads them to make short, quick inquiries with us, especially if they contact us online.” By maintaining a welcoming presence both online and off, the company states that they are able to explain what they offer and what customers stand to gain through their services much more easily.

For instance, their Facebook page explains that, “Fremont Arborist Tree Services provides certified tree expert services for Fremont, California, and the East San Francisco Bay area. Our licenced pros are standing by for all tree care needs including stump removal and stump grinding, tree removal, tree trimming, cutting and pruning, 24hr emergency tree service and tree surgeon and health care.” Separately, they add that, “The basic idea we want to get across is that you only need to call us if you have a tree that needs to be looked at. If you have tree trouble, call us immediately. Call us, email us, message us, send us a tweet, whatever you prefer. We’ll be right with you as soon as possible.”

Notably, the company’s excellent services are already reflected in the reviews they have received online. A simple, highly positive review by Maggie Johnson reads, “Great service. They removed a tree for me and all went smoothly.”

Those who wish to learn more may contact Fremont Arborist Tree Services through their many avenues of contact to inquire further about the services they offer. More information can also be found on their website.
