

Keenhealth Offers New Knee Sleeves That Provide Optimal Performance

October 14, 2019

October 14, 2019 - PRESSADVANTAGE -

Denver, Colorado based professional healthcare product manufacturer Keenhealth is pleased to announce their brand new product, the K-SK-141 BL Knee Braces. Dedicated to manufacturing top quality healthcare products, their offerings include digital thermometers, baby thermometers, pet thermometers, nasal irrigation bottles, anti-snoring strips, and pregnancy belts.

Lily, a representative for Keenhealth, says, "Our brand new product, the K-SK-141 BL Knee Braces are designed with one thing in mind: to relieve and reduce knee pain. There are many people who will no doubt attest to the fact that the knee ligaments, especially the ACL and MCL, can be very sensitive to injuries. If you've injured your knees or are afflicted with arthritis or any other kind of pain in your knees, the K-SK-141 BL can help you reduce that pain so that you can keep moving."

Knee supports work by providing compression to the knee in order to support the muscles and ligaments. These supports are also often used to maintain heat within the knee, which can increase blood flow and speed up the healing process. Knee braces such as the K-SK-141 BL can be used following an injury to speed up recovery and prevent further damage, but are also used as a preventative measure by athletes and

such to avoid damage to the knee in the first place.

“The braces will help stimulate your blood flow,” says Lily, “So, not only will the compression help you remain flexible, but you will also be able to protect your ligaments, prevent injuries, and reduce pain whether you’re working out or just going about your day doing standard activities. I’m sure it doesn’t need to be said, but strong and healthy knees are vital to being able to lead a normal life.”

The K-SK-141 BL Knee Sleeves are made with premium quality, form-fitting, high-quality compression fabric that will give the wearer the support they need when they want to find the right balance between working out and trying to spare their knees. The knee sleeves are also available in a variety of sizes, starting from Small and going all the way up to Extra Large. This allows people with a wide variety of body types to find the right size and right fit so that they have the optimal support for their injured knee. Much like the company’s other products, the compression knee sleeve is also designed to be very easy to clean. Keenhealth boasts that cleaning can be done within 15 minutes using a simple 3-step process: soak, rinse and dry.

As a manufacturer of healthcare products, all of Keenhealth’s products prioritize helping people who are facing day to day issues with their health. The company’s most popular products include the K-NS-356 Anti-Snoring Strips and the K-MB-756 Maternity Belt. The former, along with their K-NW-237 Nose Wash Bottle, is designed to provide nasal relief for congestion caused by a cold or allergies, such as hay fever, while also reducing snoring. The Maternity Belt, on the other hand, is intended to support the growing baby bumps of expecting mothers and reduce lower back pain.

“We’ve found that the right tools can give people power to do so much more than they ever expect,” says Lily. “This is part of what drives Keenhealth’s innovation policy. We are determined to create the tools that allow you to overcome your obstacles and we’re determined to give you back your freedom. Whether it’s our knee sleeves, our nasal wash bottles, or our maternity support belts, you can be sure that Keenhealth products will most definitely make your life easier.”

“As a company,” says Lily, “our goal is to make sure that our customers can live an easy and healthy life. As a part of that goal, we welcome any and all questions you may have about our products so that we can help you out to the best of our ability. We also welcome any feedback you may have so that we can improve both our products and services. Feel free to contact us via the form on our website.”

Those who want to learn more about Keenhealth and the company’s health products may visit their website for further details. Interested parties are also encouraged to contact Lily for more information. All of Keenhealth’s healthcare products can be found on Amazon, and the K-SK-141 BL in particular can be found

at the following link: Compression Knee Brace.
