

## **Robert Photos Now Offers Newboard Photo Package**

*August 17, 2015*

August 17, 2015 - PRESSADVANTAGE -

Robert Photos, based in San Diego, CA, is happy to announce that it now offers a Newborn photo package, which is focused on babies, who are newborn, 3 months or 6 months old, particularly for the North County San Diego and Carlsbad area. The photo service enterprise prides itself on its high quality photographs for various special events, and they felt that a focus on babies was what was missing from their gallery of offerings. Its primary goal is to ensure every family in the said area is able to have permanent reminders of the first few special months of their baby's life.

"By offering newborn photo packages we have really completed our services," says Robert O'Neill, an innovative portrait photographer who established Robert Photos. "Babies are individual little miracles and we love giving new parents the opportunity to remember that miracle forever."

The new package includes a variety of photographs. Firstly, there are the true newborn pictures, which are then repeated at both three months and six months, thereby showing the significant development a baby goes through in that period. Furthermore, to celebrate the launch of this new package, people can also sign up for an update photo session at a significantly discounted price.

Besides the Newborn photography package, the service also offers other packages. One of these is the

personalized service for business headshots. These photographs can be used on photo ID cards, websites and more and are created in such a way that they stand out from the crowd. "Everybody tends to hate their business headshot," adds Robert O'Neill. "It's like a passport or driver's license photograph. They never seem to come out right. Through our personalized service, however, these headshots are guaranteed to look fantastic."

Other services offered by Robert Photos include event photography, portrait photographs, lifestyle photo shoots, teens, family and a range of personal projects. Robert O'Neill wants to use photography to capture true beauty and to bring personal stories to life. He has had a passion for photography since being very young, allowing him to build on his experience and create true works of art. He sets high standards for himself, which is why he feels confident about capturing special moments in a person's life perfectly.
