

Roofing Contractor In Jacksonville Launches New Website

October 16, 2019

October 16, 2019 - PRESSADVANTAGE -

Blue Chip Roofing, a roofing contractor based in Jacksonville, Florida, has announced that they have recently launched their new website. Their reason for having a new website is to make it easier for people to understand the services that they provide and to make their website display appropriately in both desktop computers and mobile devices. They provide roofing services to both residential and commercial clients and they also offer free roof inspection, consultation and estimates.

Walter Joy, brand manager at Bluechip Roofing Jacksonville, says, "We're excited to announce that we have a new website. Basically, we have made our site mobile responsive. We are a licensed and fully insured roofing contractor in and around the Jacksonville area. In addition to that, we have a 24/7 emergency roofing service for homeowners around Jacksonville who require fast and efficient repair of their roofs that may have been damaged by a storm or any other cause."

The roofing contractor is well-known for providing reliable workmanship in Jacksonville because of their team of roof installers who have years of experience in installing and repairing roofs. Their professionals have also been properly screened to have good character so that clients are assured that their property will be handled

carefully and meticulously. They also make use of tarps and scaffoldings to ensure that the outlying spaces surrounding the work area are protected.

Walter Joy points out that it is vital for homeowners and other property owners to ensure that the roofing installation or repair is of high quality because repeated repairs or installation can be very costly and stressful. With Blue Chip Roofing, clients are assured that only premium materials and proven methodologies are employed to ensure the durability of the roof. Before providing an estimate, they will provide a comprehensive inspection of the area to make sure that will be able to provide practical recommendations, at no cost to the client. Those who want to know more about this roofing contractor can check out their Twitter page.

Blue Chip Roofing offers several kinds of services. These include roof ventilation, commercial roofing, roof repairs, roof remodeling, roof replacement, metal roofing, roof inspections, waterproofing, and gutter systems.

The proper amount of roof ventilation or attic ventilation is required for a home, which is what the company provides in its roof ventilation service. If there is not enough ventilation, especially during the winter, this could lead to moisture problems. On the other hand, too much ventilation can result into leaks that can cause blowouts during a hurricane or even permit the entry of sparks from a wildfire, resulting into a house fire. Thus, homeowners require the services of a roof expert to make sure that the proper amount of roof ventilation will be provided.

Roof repairs, especially emergency roof repairs, are vital to ensure that the repair is done quickly while ensuring that quality services are provided. The roof technicians at Blue Chip Roofing are capable of providing reliable services for both residential and commercial buildings.

The company also provides metal roofing. Their professional roofing contractors provide steel roofing installations that are fully covered by insurance in Jacksonville. And they can also waterproof a roof. This is essential because the lifespan of the roof can be reduced by the elements, such as rain, wind and snow. Hurricanes and tornadoes are prevalent in Florida and can cause a lot of damage to the roof. If water gets in, roof damage will not only be the problem. The dark and moist area can also serve as breeding ground for dangerous mold species that can prove to be a health risk for the family.

The company also offers installation of gutter systems. While homeowners and other property owners may be tempted to do this themselves, this can be risky. Gutters are available in a variety of styles, gauges and sizes and choosing the appropriate one can be a challenge. Also, improper installation can result into a number of problems.

Those who are interested in qualify roofing contractor services can check out the new Blue Chip Roofing website or their Facebook page. People may also contact them on the phone or through email.
