LED Lowcountry Offers No-Obligation Energy Audit

October 16, 2019

October 16, 2019 -
Bluffton-based LED Lowcountry offers free and no-obligation energy audits to commercial and industrial facilities in South Carolina and Georgia.

The energy audit is essential to determine how to save on energy cost, according to LED Lowcountry, the Top LED Lighting Company in Bluffton SC.

During the process, the regular operation of the business on a specific period is recorded. Data on electric consumption is gathered as well as electricity costs, light levels, fixture types and counts, facility dimensions, and fixture mounting heights. The data collected from the audit is essential to produce a roadmap on ways to save energy and for users to have significant savings.

Following the energy audit, LED Lowcountry delivers a comprehensive client proposal including product recommendations, installation costs, rebate incentives, trial fixtures, financing options, and return of investment estimates. Through the company's website, clients can provide their name, contact details, and a description of their project to avail of the free energy audit.

According to LED Lowcountry, about 40% of the electricity used by commercial and industrial facilities is for

lighting. However, it is also with the right light that some businesses can save money, eliminate maintenance costs, and improve working conditions.

The Energy Efficient LED Lighting in Bluffton SC pledges to provide complete, fully installed, and functioning solutions. LED Lowcountry said they aim to equip their customers with a competitive advantage for their business to flourish.

"Together, we will uncover the best ways to save energy for your unique facility and your unique business plan," says Joel Rudicil, founder and president of LED Lowcountry.

Joel has over 30 years of combined experience in the commercial construction and energy industries. He is a recognized leader and entrepreneur, having served in senior management of several startups. He leads the company operation along with his wife, Rhonda, who handles the administrative functions.

The leading LED manufacturers in lowcountry LED Lowcountry team is joined by seasoned industrial engineer Bruce J. Trimbur, who acts as the director of business development. Armed with his more than two decades experience, Gerald W. Helbig also joins the company as a sales associate. Dañiel Luna, who is a retired construction engineer from the U.S. Army, meanwhile serves as a lighting specialist for the lighting company.

LED Lowcountry was founded in 2013 to provide clients with better lighting for less. They offer Industrial Lighting, Warehousing, Manufacturing, Commercial Lighting, Gated Communities, Hospitality, Education, and Sports. Their customers include private and public commercial business, retail, hospitality, non-profit, and governmental entities.

The company likewise offers financing services to its customers. LED Lowcountry has partnered with several leading capital sources to fund the client's next project. The company also has rebate incentive programs.
