Best LED Lighting In Lowcountry Provides Financing Options For SC, GA Clientele

October 30, 2019

Golden Valley, Minnesota - October 30, 2019 -
LED Lowcountry, the Best LED lighting in Lowcountry, provides financing options for its clientele in South Carolina and Georgia.

Bluffton-based LED Lowcountry has partnered with several leading capital sources to help their clients fund their next project. This way, the company saves its clients from putting their plans aside due to budget constraints. Their customers include private and public commercial business, retail, hospitality, non-profit, and governmental entities.

The company, founded in 2013, provides clients with better lighting for less. They provide energy-efficient lighting solutions for commercial and industrial facilities throughout coastal South Carolina and Georgia. They offer Industrial Lighting, Warehousing, Manufacturing, Commercial Lighting, Gated Communities, Hospitality, Education, and Sports.

Likewise, the company offers financing services for the public sector and small businesses. They also have a shared savings solutions option.

The company's public sector financing is intended for municipalities that need an easy and affordable way to fund interior and exterior LED lighting upgrade projects. LED Lowcountry energy-efficient lighting solutions is partnering with Government Capital Corporation to provide this tax-exempt financing.

With this type of financing, the municipality has the prerogative to choose terms that match their budget. Public sector financing also offers low-interest rates and has a deferred payment option. Interested clients for this financing option also need board approval.

Another option for clients is the shared savings plan. Shared savings allows business owners to do both-focus on their core business and install energy-efficient lighting systems.

The High-Performance Industrial LED Lighting In Lowcountry helps businesses by installing high-efficiency lighting with no investment required by the business owner. This lighting system is expected to save commercial and light industrial facilities is about 75% on their energy costs and 100% on their maintenance costs.

"We install a revenue-grade metering system along with the lighting upgrades, to track, measure, and show our customers the savings being generated. The resulting energy savings are broken into two buckets. The first bucket goes to us for a predetermined period, usually 4-7 years. The business owner keeps the second bucket, making them cash positive from day one of the projects," the company explains.

The last financing option is intended for small businesses. LED Lowcountry helps by facilitating competitive lease financing solutions through Byline Financial Group, a wholly-owned subsidiary of Byline Bank.

This financing option is open for businesses with commercial projects from $3,500. It is intended for customers coming from retail, commercial office, auto dealerships, parking facilities, hospitality, healthcare, multi-family, and non-profit agencies.

To know more about these financing options from LED Lowcountry, visit their website at https://www.ledlowcountry.com or call them at 843 706-7074. They are also located at 20 Towne Center, Suite 276, Bluffton, SC 29910.
