Morgan Utah Disaster Specialists Provide Mold Inspection Services

October 28, 2019

October 28, 2019 -
Centerville, Utah based Utah Disaster Specialists is reaching out to the community to share details about a recent project they completed. The company works on homes that have damage caused by fires, flooding, mold, and other similar accidents.

In a recent job, Utah Disaster Specialists were contacted by a homeowner who suspected the growth of mold in their home. When the team from the company visited, they found that the slope on the home had created a perfect opportunity for an ice dam. This had allowed water to make its way under the shingles and roofing and collect in the attic. Since the attic lacked proper ventilation, the collection of water had increased the humidity of the space and led to the growth of mold on all wooden surfaces.

Daryl Olsen, Owner of Utah Disaster Specialists, says, ?If you have seen mold in your home, or even if you?ve just caught a musty odor that causes you to suspect mold, you need to take action. In this situation, things would have gotten so much worse if the homeowner had ignored his suspicions. Mold can be far more dangerous than you think it is, and getting your home inspected is always the wisest course.?

As Olsen says, mold can be an extremely dangerous presence in a home. Mycotoxins have proven to have several negative effects on human beings, including memory loss, a reduction in focus or concentration, chronic fatigue, headaches, nose and throat irritation, and more.

?The first step is to get your house inspected for mold,? advises Olsen. ?This crucial step will allow your mold removal specialist to look for hidden water damage that most homeowners would be unaware of. A leak behind a wall, for instance, is not going to show any visible signs of mold until you?ve actually removed the wall. At Utah Disaster Specialists, we have the experience and the tools needed to find that hidden mold on your property. Then, we can take care of it.?

The company provides mold inspection and removal services for the reasonable price of $2900. They also provide a number of other services, including but not limited to fire and smoke damage cleanup, air duct cleaning, cleanup for water damage in Morgan Utah, and more.

Utah Disaster Specialists? dedication to their clients has earned them glowing praise from Utah residents. The company maintains a 4.5 star rating on Google. In a recent review, Sara Penquite says, ?I called Utah Disaster Specialists when my basement apartment flooded and my landlord was out of the country and unavailable. Other companies were not willing to help me without my landlord's permission, but Daryl went out on a limb and was willing to help me. Flooding is always a very stressful situation, and I was very appreciative that someone was able to help me. I highly recommend this company.?

In another review, Valerie Sanchez says, ?Our family, unfortunately, experienced a fire in our home. We called Utah Disaster Specialists to help us. They were so helpful with all of our questions and did a wonderful job helping us clean up and rebuild. We really appreciate all of their hard work and help.?

On Facebook, the company is rated 4.8 out of 5. Coby Johnson says in his review, ?Wow, am I glad I called these guys! My home was flooding from a backed up toilet, which was getting sewage everywhere in my basement. These guys made me a priority, or if they didn't, I felt like a priority. They got to my home quickly, got all the sewage out, and helped me file a claim with my insurance. There is no one I would recommend more than Utah Disaster Specialists. I would recommend them to all having similar problems as me.?

Those who want to learn more about Utah Disaster Specialists and the services they provide can find more information on the company?s website. Interested parties can also get in touch with Daryl Olsen directly for further details. Utah Disaster Specialists also has a page on Facebook, where they post updates, share information, and communicate with their clients.
