

Honolulu Breast Augmentation Specialist Earns International Recognition For Swift Recovery Outlook

November 12, 2019

November 12, 2019 - PRESSADVANTAGE -

Honolulu, Hawaii based Dr. Randy Wong of Honolulu Plastic Surgery is pleased to announce that their surgical techniques have been received well internationally thanks to their ability to reduce scarring and pain following surgery (with minimal recovery time). Those who want to look their best for year end festivities need to plan ahead in advance due to the demand for treatment. The Honolulu Plastic Surgery office will make every accommodation to organize each patient's breast augmentation journey, including consultations and plans to help with their demanding timetables and recovery.

Dr. Randy Wong stated, "My training was based on the reconstructive skills that were taught to me directly by some of the best plastic surgeons in the world. I've developed and used newer innovative techniques which help minimize pain and dependence upon painkillers for my patients. This helps aid their recovery, minimizing the time needed to recover."

Many women are unhappy with the size and shape of their breasts, and for those with macromastia (where the breasts never develop), or those who develop asymmetrical breasts, this can be an embarrassing condition. For those who have had children, the breasts and other parts of the body may sometimes fail to

bounce back as they prefer. Similarly, aging can cause other changes that many women do not like. Men too can suffer from excess breast tissue due to hormonal changes, weight gain, hereditary conditions, or the use of certain drugs (including anabolic steroids and marijuana). The Honolulu Plastic Surgery Center has seen virtually every type of condition.

Dr. Wong is certified by the American Board of Plastic Surgery, and was named one of the Top Plastic Surgeons in the 2019 Patient's Choice Awards—a rank that he has held for many years. Many of his patients leave online reviews giving him top marks across the board. Patty F, for instance, said in her Google Review, "After checking out several doctors, I decided to have Dr. Wong do my breast reduction surgery. It's been two weeks post op and I know I made the right decision. During the consult, he patiently answered all my questions and I never felt rushed or like I didn't have his full attention. He walked me through the surgery and told me what to expect, one thing being little to no pain post-surgery. True to his word I had zero pain, never needing any pain killers, not even Tylenol! Dr. Wong is absolutely the best and my only regret is not doing the surgery years ago."

Each patient can rest assured that their surgery has Dr. Wong's full attention with maximum amount of forethought and planning. This means there is far less room for errors and excess scarring. Another patient, Sofia L., said on Yelp, "If I could give them 10 stars I would. Dr. Wong and Mrs. Wong were amazing the whole way through. From the consult onwards, they made me feel comfortable and reassured that they would take care of me. The surgery itself went so smoothly. I had almost no bruising and very little pain. I had my implants taken out and a breast lift. I was without pain in three days. Dr. Wong is so gentle, and uses the best and most up to date techniques to ensure excellent results. I highly recommend him for any of your needs. I am so happy."

The Honolulu Plastic Surgery Center is famous for the conscientious care they maintain with their patients. Those seeking Honolulu breast augmentation have many reasons for deciding to choose Dr. Wong, but they all benefit from having clothes that fit correctly. Many of his patients wish they had had the surgery years before. Given that time is of the essence to live each season with gusto, those who wish to look their best in time for year end festivities are advised to call the surgery or message to request an appointment.

The practice was recently featured on the KTVN TV news site for their breast augmentation procedures with shorter recovery periods. In their article, Dr. Wong stated, "There are a multitude of reasons why a woman would want to have her breasts altered. On one side of the equation, we have patients that feel their breasts contribute to their poor self-esteem issues, so we take pride in correcting this through our industry-leading procedures." The article also highlighted that they receive many patients who wish to select a cup size that they are physically comfortable with.

Anyone who would like to learn more about the practice or schedule a consultation may contact Dr. Randy

Wong of Honolulu Plastic Surgery. More information is also available on their website, at <http://honoluluplasticsurgerycenter.com/>. Patients may also connect with the practice through their preferred social media channels.
