

Cosmetic Dentist in Santa Ana Now Offering Specialized Cosmetic Dentistry Services

November 06, 2019

November 06, 2019 -

Santa Ana, California-based Pacific Dental Smiles is proud to announce they are now offering specialized cosmetic dentistry services in the Santa Ana area. Dr. Michael Danial, a cosmetic dentist in Santa Ana and Ontario residents have started to become familiar with after moving his practice to the area in 2018, says he's very excited to bring some of the most popular procedures to the area.

It's understandable that some people might feel a little trepidation about coming into the dentist's office, Dr. Danial says. "Not only do patients feel like they'll be talked down to or even embarrassed by visiting the dentist, a lot of times dentists' offices can feel like they're just churning through patients with absolutely no specialized care and no personable service. Our aim is to serve our neighborhoods with affordable, caring service. Everyone deserves a great smile, and bringing in our new cosmetic dentistry services aims to help people achieve that."

One of the more popular procedures that Dr. Danial and his team provide are veneers. Veneers are coverings, typically made out of porcelain, that are made to fit specifically over a patient's tooth. Dr. Danial says that people who have tooth discoloration, gaps in between teeth, chipped, broken or worn-down teeth,

or even dark lines should consider getting veneers.

“When it comes to veneers in Santa Ana, residents might immediately think that it is mainly for making your teeth look evenly shaped and spaced with a consistent color when one smiles,” Dr. Danial says. “But a bonus to having veneers is that they’re really good at fighting stains as well as adding durability to your teeth. In fact, veneers may even help to protect your teeth so you don’t have to visit us as often. The procedure only takes two visits and uses local anesthesia, so it’s quick and painless.”

Dr. Danial explains how the veneer procedure works. During the first visit, Dr. Danial will remove a thin layer of enamel from the patient’s tooth (or multiple teeth depending on the patient). Once this is done, an impression is made of the patient’s teeth so that the veneers will be custom made for them. The impression is then sent to a laboratory to be made. Typically, it takes about two weeks for the veneers to be made, and in the meantime, temporary veneers are placed over the patient’s teeth.

Once the veneers arrive, the patient will come back to the office to make sure the fit is perfect and adjust them as necessary. After this is done, the patient’s teeth are then cleaned and polished, and the veneers are installed and permanently bonded to the teeth.

Dr. Danial also notes that another procedure that has become popular in recent years is Invisalign. “We’ve noticed that more and more patients are preferring Invisalign. The procedure for Invisalign Santa Ana residents want the most helps to straighten their teeth when they don’t want all the metal from traditional braces. They’re turning to using clear tooth aligners to make their smile look like a million bucks without having to spend a million bucks. They won’t feel uncomfortable smiling with all the metal showing,” he says.

Along with veneers and Invisalign procedures, Pacific Dental Smiles also offers general dentistry such as cleaning, crowns, root canals, and more. Special dentistry, pediatric dentistry, and emergency dentistry are also available.

With a hand-picked staff, modern equipment, and affordable pricing, reviews from Santa Ana residents about Pacific Dental Smiles have been extremely positive. Over on Yelp, Andy S. said, “Dr. Michael Danial and his team are terrific. We have been going to him for several years and now that the kids are older our whole family sees him. He’s thorough and honest, and we really appreciate having him as our dentist.”

Those looking for information on the dental procedures that Pacific Dental Smiles offers, read Frequently Asked Questions about the practice, see before and after pictures, or just to make an appointment, are encouraged to visit the practice’s website and social media profiles.
