

## **Parente & Norem Personal Injury Attorneys Now Have Asbestos Exposure Lawyers In Chicago**

*October 28, 2019*

October 28, 2019 - PRESSADVANTAGE -

Parente & Norem, P.C. has introduced asbestos exposure legal services in Chicago. The law firm is a civil litigation firm providing personal injury law services. The company also concentrates on wrongful death claims and worker's compensation cases.

According to the Chicago personal injury law firm, ?If you have been diagnosed with mesothelioma or other illness and have been told by a medical professional, or suspect that exposure to asbestos is the likely cause of your disease, contact The Law Offices of Parente & Norem, P.C. mesothelioma lawyers in Chicago to discuss your asbestos litigation options.?

Asbestos litigation is a complicated process. Hundreds of thousands of asbestos claims have been filed throughout the United States, with many more filed daily. Diseases caused by asbestos exposure, including mesothelioma, can take a significant amount of time to develop and typically many years pass between exposure and diagnosis. Even if you have yet to develop an asbestos-related illness, if you know you have been exposed to asbestos, you may still be able to file a litigation claim.?

Apart from providing the legal services the firm also provides information to help people seeking these services understand what they need to do or whether they are qualified to get these legal services. Part of the site states that, ?Mesothelioma is linked to asbestos exposure, and the exposure need not be large or extensive. Since Mesothelioma can take decades to develop, and because symptoms resemble other prevalent illnesses, it is very difficult to diagnose. Failure to diagnose mesothelioma may not preclude your ability to file a claim. If you have mesothelioma and are unaware of any past asbestos exposure, you may still have a claim. Our lawyers here at the Law Offices of Parente & Norem can evaluate your situation and provide litigation guidance.

?Law does not ban the use of asbestos, but most United States manufacturers no longer use it. Asbestos has the potential to cause serious disability, cancers including mesothelioma, and eventual death. Knowingly using this harmful material can expose the employer to litigation. Asbestos attorneys routinely advise that United States manufacturers resist using asbestos material in their products.?

For more information on Chicago asbestos exposure legal processes and other legal services, visit the firm's website.
