

VOLUME & BASS

Bluetooth Speaker Features Cited As The Best In Amazon Reviews

August 06, 2015

August 06, 2015 - PRESSADVANTAGE -

Volume and Bass, a popular electronics company, has recently received a number of detailed five star reviews on Amazon for its Bluetooth speaker. Amazon customers currently find it to be the best speaker with regards to features, in the marketplace.

The cylindrical shaped speaker, which can be viewed at <http://volumeandbass.com/wirelessspeakersbluetooth>, provides 10 watts of power output, and includes a built-in rechargeable 2000 mAh battery that provides 12 to 15 hours of playtime. It also doubles as a speaker phone when used with mobile phones, and has a two foot range microphone that enables the user to make or receive calls even while listening to music.

The mini Bluetooth speaker also offers a number of additional features, many of which have resulted in its high Amazon ratings. These include a micro SD/TF card, auxiliary function, USB input, and a 3.5mm audio jack. The Bluetooth speaker package includes the speaker, a USB charger, auxiliary cable, user manual, and a bonus travel pouch.

Amazon buyers are finding it more than useful. One customer said, "This is the best portable speaker ever. Its size is perfect and the sound is amazing. The sound really fills up the room, and the speaker has more bass on a portable speaker than I've ever seen. The battery life is also great. I have used this thing for days in a row and only had to charge it one time."

Another Amazon customer stated, "I have been using my portable Bluetooth speaker for about two weeks, every single day, and rarely have to charge it. It is so easy to connect, and I love that you can use it as an external speaker with your phone. I've had it plugged up to my MacBook Pro, iPad, iPhone, and the Samsung Galaxy, and it works great every time."

Volume and Bass owner Huy Nguyen has responded saying, "We are really pleased that our customers love the speaker so much. We're amazed at the outpouring of positive reviews that have come our way."
