Clients Increase Value Asset With Leading Geotechnical Data Services In Long Island

October 31, 2019

October 31, 2019 -
Companies investing in property development or land divestment can optimize their assets through the help of PG Environmental Services Inc., the Leading Geotechnical Data Services In Long Island.

PG Environmental Services Inc. is a New-York based full-service environmental servicing company. It is a fully-equipped and professionally-staffed company that provides a complete range of subsurface explorations and geotechnical investigations. The company started serving clients in New York, particularly Hauppauge, in 2017.

One of its key products is Geotechnical Data Services, which has a vital role in property development. Geotechnical data services involve the study of soil behavior under the influence of soil water interactions and loading forces. This knowledge is therefore utilized in the foundation design, clay liners, earth dams, retaining walls, and geosynthetics for containment of waste of a construction project.

PG Environmental Services Inc. likewise provides Geotechnical Data in Long Island by first assessing the stability and strength of the soil. A team of experts from the company works closely with contamination land

experts when needed by designing solutions that can fully optimize its client?s assets, whether it?s property development or land divestment.

Following the assessment, geotechnical engineers create a report. In the report, all subsurface exploration data is summarized and contains the date on subsurface soil profile, laboratory test results, and groundwater information and exploration logs. The engineers also analyze and interpret the established subsurface data. The report also serves as a detailed basis for engineering designs.

Analysis of conditions with anticipated problems and solutions is also included in the report. Among the factors being looked into by geotechnical engineers include landslides, mining, weak/soft ground, sinkholes, and groundwater, among others. Through the help of experts from the PG Environmental Services Inc., the clients can already assess the risk factor of your building and properties.

To know more about the company?s geotechnical data services, and other environmental services and capabilities, visit the PG Environmental Services? website at https://www.pgenviro.com. Their other services include groundwater sampling, soil sampling, monitoring wells, and underground tanks (UST) or aboveground tanks (AST) removal and excavation.

The company also offers Ground Penetrating Radar devices which can be used to locate objects like post-tension cables, rebar, or conduits.

Aside from its clients throughout Long Island, the company is also servicing the Metro New York Area, including Manhattan and the Boroughs (The Bronx, Brooklyn, Manhattan, Queens, and Staten Island).

PG Environmental Services is located at 175 Commerce Drive, Unit N, Hauppauge, NY 11788. For queries, clients can reach them through 631-901-1888.
