

Shape North County Now Offers Erchonia's ZERONA Laser for Noninvasive Fat Reduction

November 12, 2019

November 12, 2019 - PRESSADVANTAGE -

San Diego, CA ? ? Shape North County is now accepting appointments for Erchonia's FDA-approved ZERONA laser treatment for the safe and effective non-invasive circumferential reduction of the waist, hips and thighs.

The ZERONA emits neither heat nor cold?in fact, most people can't even feel it. The ZERONA laser creates a pore in fat cells, fat leaks out and the fat is then processed by the body as waste. The cell is not destroyed and can still secrete beneficial hormones. During a double-blind, placebo-controlled, multi-site clinical trial, clients treated with the ZERONA laser lost an average of 3.72 inches from their waists, hips and thighs without any dietary changes, exercise requirements or supplements.

After multiple double-blind studies, ZERONA has been given FDA 510(k) market clearance for overall body circumference reduction.

Dr. Keener comments, "ZERONA is the future of effective body contouring without surgery. We are delighted to offer our clients a non-invasive body-contouring option with impressive, proven results. Clients can continue

their daily routines immediately following a Zerona treatment, and there is no downtime, pain or negative side effects associated whatsoever.?

For best results, Dr. Kupper recommends six Zerona treatments, one forty-minute treatment every other day for two weeks.
