PG Environmental Services Inc. Employs State-Of-The-Art Soil Sampling System

November 08, 2019

November 08, 2019 -
PG Environmental Services Inc., the Best Long Island Soil Sampling, is employing state-of-the-art soil sampling system on its services.

The company utilizes the Geoprobe® DT22 Soil Sampling System. It is a direct push system for collecting continuous core samples of unconsolidated materials from within a sealed casing of Geoprobe® 2.25 inches outside diameter probe rods. Samples are collected and retrieved within a liner that is threaded onto the leading end of a string of Geoprobe® 1.25 inches OD light-weight center rods and are inserted into the bottom of the outer casing.

Using this method, PG Environmental Services Inc. shows how it gives importance to providing accurate information to its clients.

?Since soil sampling shows the available nutrients in the soil, this makes it important in nutrient management planning. It?s therefore important to consider the technique used in sampling the soil, timing, and type of analysis for you to get accurate results?If proper soil sampling is done, the result will be accurate, and the

right nutrient recommendations will also be given,? the company states on its website.

Through the Geoprobe® DT22 Soil Sampling System, the company is able to give the right recommendations when it comes to assessing the available nutrients as well as the fertility of the soil.

PG Environmental Services Inc is a full-service environmental servicing company. It is a fully-equipped and professionally-staffed company that provides a complete range of subsurface explorations and geotechnical investigations. The company is also mainly serving Long Island, New York. The company is also servicing the Metro New York Area, including Manhattan and the Boroughs (The Bronx, Brooklyn, Manhattan, Queens, and Staten Island).

Soil sampling is one of the major services of the company. The company is also offering Geotechnical Data Services in NY, which is essential in property development. They also provide Ground Penetrating Radar devices which can be used to locate objects like post-tension cables, rebar, or conduits.

Their other services include groundwater sampling, monitoring wells, and underground tanks (UST) or aboveground tanks (AST) removal and excavation.

The environmental servicing company also provides its clients with the highest standards of quality control and quality assurance. They can maintain such high standards through the work of experienced and certified drillers and helpers.

PG Environmental Services is located at 175 Commerce Drive, Unit N, Hauppauge, NY 11788. For queries, visit their website at http://pgenviro.com clients can reach them through 631-901-1888.
