

Sunshine Retirement Living Adds New Assisted Living Community

November 25, 2019

November 25, 2019 - PRESSADVANTAGE -

Bend, Oregon based Sunshine Retirement Living is pleased to announce the recent addition of Belleview Heights Assisted Living and Memory Care (Aurora, Colorado) assisted living community to their nationwide network of assisted living facilities. Sunshine focuses on providing person-centered care all across the United States. Their communities are designed to provide a warm and secure environment that encourages residents to feel safer and more engaged with their daily activities.

The Belleview Heights team strives to ensure that their residents are as independent as they can possibly be in a private setting that provides the personalized attention they need. "Belleview Heights is not just a memory care facility, we are a memory care community," says the team. "We offer a warm and welcoming senior community for those in need of assisted living, transitional assisted living or memory care."

By combining person-centered care with an extensive wellness program, the assisted living center provides residents with everything they need to fulfill their physical, social, emotional, cognitive, and spiritual needs. Their Aurora memory care facility offers transitional assisted living for people beginning to experience memory challenges as well as memory care for those beginning to experience challenges with their memory. Those who are in the early stages of dementia can make their home at the Aurora assisted living center, where they will find the care they need. Belleview Heights' professional staff is available day and night, working tirelessly to ensure their residents' comfort.

"Our mission is to provide a warm and secure environment that encourages residents to feel more independent, safe, and engaged," says Belleview. "Residents can choose from multiple floor plans, including private and semi-private suites as well as companion suites. Belleview Heights memory care facility residents receive person-centered care, with care options ranging from dressing assistance and personal hygiene to medication and continence management and more in an encouraging and nurturing environment. Our team seeks to foster independence over dependence in a private setting to provide the personalized attention your loved one needs."

The community's memory care program is built around the six Sunshine Pillars of Wellness, which are physical engagement, spiritual support, sensory stimulation, social connections, intellectual discovery, and emotional expression. Residents will have the opportunity to enjoy music therapy, aromatherapy, validation techniques, social activities, health and wellness activities, and life skills stations as part of Bellevue Heights' memory care programs. The community also retains a certified Life Enrichment Director who leads engaging daily activities, weekly on-site social events, and fun cultural excursions as part of a research backed health and wellness program.

"Bellevue Heights is an amazing facility," says a 5-Star review on the Google review platform. "They are educated with the variety of memory care issues and concerns. They provide programs to stimulate the client's mind, have wonderful kind caregivers, and are well-staffed with nursing care. The Administration team is so supportive at various levels. This facility is stellar!"

Another review goes into extensive detail praising the assisted living center's numerous facilities. "I believe Bellevue Heights is the #1 care community in all of Denver for people with dementia, especially Alzheimer's and Frontal Temporal," the reviewer states. "From their purposefully built building to their care, they truly understand the needs of the residents and their families, and the employees who give the care. The staff manages by walking around, not by task centered care. The peacefulness of the community is felt immediately when you walk in. The residents are bright eyed and converse readily as redirection skills are utilized over medication."

Every apartment features convenient individual temperature controls for maximum comfort, along with safety pull-cords, and residents also wear location-based pendants. Caregivers have been known to love Bellevue Heights' short-term and respite stay program. Whether they are going away on business, planning a vacation, or are in need of a break from caregiving, the respite care program is the perfect solution for providing loved ones with the person-centered care they need.

Sunshine Retirement Living manages over 30 retirement communities across the United States. By providing a full range of services in their living facilities, Sunshine promotes a sense of independence, confidence, and community among their residents. Those looking for an assisted living facility for their loved ones are encouraged to contact Sunshine Retirement Living today.
