

Mobile Window Tinting Offered in Ahwatukee Phoenix Arizona

November 19, 2019

November 19, 2019 - PRESSADVANTAGE -

Ahwatukee Window Tinting LLC, based in Phoenix, Arizona, has announced that they are offering mobile window tinting to vehicle owners in Ahwatukee Foothills, or simply Ahwatukee. This is an urban village located in the southernmost portion of Phoenix and is considered to be a part of the East Valley region of the Phoenix Metropolitan Area. The window tinting work provided by the company has a lifetime warranty and the films they use are able to block out 99 percent of the UVA and UVA rays of the sun.

Paul K, a spokesperson for Ahwatukee Window Tinting LLC, says, "It isn't always true that you have to tint your truck or car. But there is a low-cost option that lets auto owners display their own personality: window tinting. Drivers may choose to tint their windows for many reasons. Some may do it for medical reasons. They may have a condition that makes them sensitive to sunlight. Others do it to prevent the sun from fading their car or trucks from the inside or to protect their privacy. But they also tint their windows simply because they want to protect themselves."

It is all a matter of preference. Some vehicle owners may prefer bumper stickers but others want to have the vehicle windows tinted. They can also display their specific interest with their window tint. Some may have the rear window of their pickup trucks tinted with the national flag to display their patriotism. Meanwhile, campers may decide to have a serene river or a snowy mountain to express their interest in camping. And hunting enthusiasts may want to have images of deer and other animals displayed on their windows.

Meanwhile, it should be noted that the window tinting process has been becoming easier. There are now many stores that offer window tint by the roll. Other stores may also sell static cling patterned films. They are both affordable and quite easy to install. But then again, it is advisable to let the experts do the installation as inexperienced people may commit a number of mistakes, resulting in the need to remove the tint and put in a replacement.

Ahwatukee Window Tinting LLC also offers window tint removal. If the car owners find that their current window tint has not been installed properly or they want different images, the company provides a way to remove the window tint. There are many reasons why car owners would want the current window tint to be removed. First, the window tint has started to bubble and to be warped. Or the tint has turned into purple. Or the tint is not in compliance with Arizona law. And lastly, the window may be interfering with the GPS and other devices.

They want to point out that removing the window tint is not as easy as it seems. It is not as simple as peeling off the tint's outer layer. There is a sticky layer of adhesive under the tint. This adhesive may be affected by pollution so that the glue has become difficult to remove. If an inexperienced person tries to peel it off, much of the glue may be left on the glass, making it translucent and difficult, if not impossible, to drive.

Therefore, it would be best to leave the removal of the window tint to the experts like the professionals at Ahwatukee Window Tinting LLC. It should also be noted that there are laws in Arizona that govern window tints. Arizona law specifies tint darkness for various vehicles. For sedans, a non-reflective tint is permitted for the windshield that is above the manufacturer's AS-1 line. Front side windows must be able to permit more than 33 percent of the light in. For the back side windows and rear window, any tint darkness can be used. Thus, it would be advisable to allow professionals to install the window tint to ensure it complies with the law.

Those who are interested in the window tinting service offered by Ahwatukee Window Tinting LLC can visit their website or contact them on the telephone or through email. They are open from Monday to Friday, from 8:00 am to 5:00 pm.
