

TWT Exteriors & Roofing Announces New Website

November 25, 2019

November 25, 2019 - PRESSADVANTAGE -

TWT Exteriors & Roofing, a company based in Austin, Texas, has announced that they have a new website. This is an Austin roofing company with more than 50 years of combined experience in the home improvement industry. Each team member is focused on developing really long-lasting relationships with their clients, built on integrity, trust, and customer satisfaction. And, of course, they ensure that they provide cost-effective solutions for roofings and exteriors.

Keith Wright, owner of TWT Exteriors & Roofing, says, "We're excited to have a new website and we hope that it makes people better understand the services that we are able to provide. Hopefully, we have made it clear that it is our mission and top priority to provide exterior improvements for your home, property and/or business providing the highest levels of trust, integrity and craftsmanship in the market. We will always have your pocketbook in mind and strive to be as cost effective as possible with the ultimate goal of complete customer satisfaction. In earning your trust we look towards the future in becoming your go to contractor for all your future exterior projects so that you don't ever have to search for another contractor again."

For residential roofing, they offer a 10-year workmanship warranty on any type of roof repair or roof replacement, and they can also offer various options, such as asphalt composition shingles, metal roofing, and tile roofing. Composition shingles are currently the most popular type of material for residential roofs.

This is because the asphalt composition shingle offers the most cost effective solution for a home's roofing requirements. These asphalt shingles can either be organic or glass fiber. Both types have ceramic granules that have the function of protecting the roof against premature deterioration caused by the ultraviolet radiation from the sun, while also providing unique aesthetics.

The company is also an Austin commercial roofing contractor and their team members are familiar with the Southwest climate. Thus, they are able to take the heat and weather into account when discussing and suggesting roofing alternatives for their clients. They are also well-versed with commercial roofing and the details that provide the difference between a good roof and an excellent roof. They only make use of the highest quality commercial roof systems, which are expected to last for a very long time.

Just like with residential roofing, they offer various alternatives for commercial roofing. These include single-ply, built-up, modified bitumen, and silicone and acrylic coating. The single-ply roofing is made up of a single waterproof membrane that is welded at the seams or fully adhered in order to offer a flexible, lightweight, and low-cost roofing solution for commercial buildings. Clients can choose from EPDM, TPO, and PVC products for the single-ply roofing.

And for commercial roofing that need to stand up to heavy traffic, the build-up roofing is recommended. This is composed of several layers of waterproofing and strengthening materials to provide the best protection. Meanwhile, modified bitumen roofing offers both benefits of durability and flexibility. And finally, the silicone and acrylic coating is to provide lightweight monolithic coatings that prolong the life of a roof without adding substantial weight. It also offers the benefit of being easy to complete, offering savings in both time and money.

Aside from roofing, TWT Exteriors & Roofing also provides home exteriors construction. One example is stained and stamped concrete. They offer staining and drying concrete services that can result into beautiful walkways, floors, entryways, patios, including driveways. They can use various methods, such as scoring, staining, etching, and coating to provide finishes that appear like marble, tile, wood, flagstone, and more.

People who are looking for commercial and residential roofing contractor Austin residents and businesses can depend on can check out the TWT Exteriors & Roofing website, or contact them on the phone or through email. They are open from Monday to Friday, from 8:00 am to 6:00 pm, and on Saturdays, from 10:00 am to 2:00 pm.
