

TWT Exteriors & Roofing Offers Free Estimates, Consultations and Bids on Home Renovations

November 25, 2019

November 25, 2019 - PRESSADVANTAGE -

TWT Exteriors & Roofing, based in Austin, Texas, has announced that they are currently offering free consultations and bids for roofing on home renovation projects. The company is a provider of commercial and residential roofing services in the greater Austin and San Antonio areas. The company is family owned and operated, which means they offer a personal touch not only in the relationships they build with their customers, but also in the craftsmanship and the quality of the work that they provide.

Keith Wright, owner of TWT Exteriors & Roofing, says, "With over 50 years of combined experience in the home improvement business our highly skilled team at TWT Exteriors is here to assist you with all your exterior improvements for your home, property and/or business. Every member of our team prides themselves on building long-lasting relationships with our clients built on trust, integrity and customer satisfaction. We will always strive to be as cost effective as possible. We understand the importance of working with each individual client on their project from start to finish ensuring that you are 100% satisfied throughout the entire process."

For residential roofing, TWT Exteriors & Roofing offers a 10 year workmanship warranty on any roof

repair or roof replacement that they perform on the client's property. They can handle asphalt composition shingles, metal roofing, tile roofing, and more.

They offer composition shingles because these are currently the most popular type of residential roof material. It offers one of the most cost effective solutions for a home's roofing requirements. The two kinds of asphalt shingles that they use are: organic and glass fiber. Both types make use of ceramic granules that serve to protect the roof from premature deterioration caused by UV rays, while also providing unique aesthetics.

They also offer metal roofing as it is one of the most durable building materials. Metal roofing does not only offer exceptional aesthetics and durability but also enhanced energy efficiency compared to traditional roofing materials. And then there is the clay tile roofing. This kind of roofing material provides the kind of aesthetics that is required for southwestern or Spanish Mission home designs, including modern designs. Tile roofing is also long lasting and it needs only a little maintenance. Their only disadvantage is their fragility but they are very much resistant to the elements, including UV rays.

They also provide roofing services for commercial establishments, no matter what the size, design, material, or complexity. One of the kinds of roofing material that they use for commercial buildings is the single-ply waterproof membrane that is welded together to provide a lightweight, low-cost, and flexible roofing solution. For this type of roofing, they offer EPDM, TPO, and PVC products.

For commercial buildings, they also offer built-up roofing. This is made up of several layers of waterproofing and strengthening materials in order to provide superior protection. This is usually recommended if the roof has high traffic areas. And then they also offer the modified bitumen roofing. This offers the advantage of combining flexibility and durability.

And finally for commercial buildings, they also provide silicone and acrylic coatings. These are lightweight monolithic coatings that can prolong the life of the roof without adding substantial weight and this can be finished in much less time and less cost compared to the traditional tear off and reroof method.

TWT Exteriors & Roofing also provides house sidings. They offer various options when it comes to siding material. The most durable is brick, which can last for more than 100 years. If a less costly material is required, there is the brick-veneer, which looks just as appealing as brick. Stucco may also be used. This is cement combined with water and other ingredients, such as sand or lime. It provides a rock hard surface that keeps moisture out. There are also synthetic stuccos although not as durable.

Those who are interested in residential and commercial roofing services in Austin and San Antonio, Texas, can visit the TWT Exteriors & Roofing website, or contact them through the telephone or via email. They are open from Monday to Friday, from 8:00 am to 6:00 pm, and on Saturdays, from 10:00 am to 2:00 pm.
