

Pediatric Eye Care Center Offers Comprehensive Approach For Vision Therapy In Austin, TX

November 27, 2019

November 27, 2019 -

Texas based Austin Vision Therapy Center is pleased to announce that they are offering advanced and versatile pediatric vision therapy to residents of Austin and the surrounding areas. Austin Vision Therapy Center is dedicated to the specialties of developmental, behavioral, and neuro-optometry, which enables them to take a thorough approach to vision development, learning disabilities, strabismus and amblyopia, attention deficit disorders, and traumatic brain injuries.

?Our mission is to improve the lives of our patients, especially kids,? says Dr. Denise Smith, Founder and Clinical Director at Austin Vision Therapy Center. ?At Austin Vision Therapy Center, we offer a number of services which go beyond traditional treatment methods. We pride ourselves in offering the most comprehensive solutions targeted at treating delayed vision development, poor visual efficiency, learning disabilities, and other related medical conditions,? She also explains that the center focuses on providing vision care that consistently exceeds client expectations, and they are at the forefront of integrating modern procedures into their treatment programs. She adds, ?With the help of the latest technologies in optometry together with our team of highly skilled eye specialists, we are able to offer the best treatments and procedures to our patients.?

Meanwhile, as noted on the center?s website at http://austinvisiontherapycenter.com/, Austin Vision Therapy Center offers a wide range of medical services that include surgery and vision care to address a number of visual problems and eye disorders. The center explains that visual disorders are a common phenomenon, especially with children. Often, a child?s brain receives mixed signals which lead to difficulties in sight and comprehension as well as their ability to process information. Fortunately, Austin Vision Therapy Center conducts comprehensive tests to accurately diagnose visual disorders and provide a number of vision therapy options. They include vision therapy, neuro-optometric rehabilitation, eye surgery, and more.

Vision therapy is one of the most effective solutions to address most eye-related problems. By utilizing visual aid tools and therapeutic sessions, the eyes learn to work together so they can focus more effectively and properly. Meanwhile, patients who have had visual problems after having a stroke or traumatic head injury can benefit from neuro-optometric rehabilitation program to improve their vision and eliminate other symptoms like headache, blurry vision, and sensitivity to light, among others.

On the other hand, there are common disorders that are often confused with visual problems, such as Dyslexia, ADD and ADHD. Fortunately, the doctors at Austin Vision Therapy Center can properly diagnose such medical conditions and suggest treatments accordingly. Furthermore, the eye specialists at Austin Vision Therapy Center specializes in treating Strabismus and Amblyopia as well as helping young patients to improve their ability to read and learn more easily.

Austin Vision Therapy Center is one of the most trusted pediatric eye care centers in the greater Texas area, based on a number of positive reviews and recommendations they have received online. In fact, they have an average rating of 4.9/5.0 on the Google review platform.

Valerie Mutter says in their 5-Star Google review, ?We had an amazing experience with Dr. Smith and her team. Our son had a significant concussion and, after visiting several doctors, including child neurologists, we eventually had the opportunity to meet with Dr. Smith. She was amazingly thorough, and was able to uncover several deficits affecting our son's vision, as well as his brain's ability to process what he was seeing. He had even significantly lost his peripheral vision.?

Mutter continues, ?After many months of therapy, he was able to regain all of his peripheral vision and his brain's vision processing skills which, in turn, improved his reading and academic skills, as well as his ability to participate in sports related activities requiring fast visual processing skills. We can't thank them enough. They truly changed our son's life. It was the best money we have ever spent to help our son. Thank you, Dr. Smith and team.?

In another 5-Star Google review, Candace Blan says, ?We are halfway through vision therapy. One year into

a two year program, and the difference it has made in my daughter's life is huge. Dr. Smith and her staff are wonderful. Tracie at the front desk is the best. She goes out of her way to help answer questions or make scheduling work. We will definitely miss them all when we finish vision therapy.?

More information can be found on the eye center?s website. Alternatively, interested parties may connect with Austin Vision Therapy Center through their official social media pages to stay up to date with their latest news and important announcements.
