

Thermopeutic Ice Pack Speeds Up Knee Replacement Surgery Recovery and Reduces Time Off Work

November 25, 2019

November 25, 2019 - PRESSADVANTAGE -

Thermopeutic, a business based in Las Vegas, Nevada, has announced that they are offering the Thermopeutic Reusable Ice Pack for speeding up knee replacement surgery recovery and reducing time off work. This ice pack has been designed to be cold for a longer time compared to other products. It makes use of a unique cold formula gel to ensure that its cold temperature will last longer, allowing people to recover from their pain and injuries as fast as possible so that they would be able to return to their regular routine.

Most individuals are able to care for themselves as well as resume regular everyday tasks within 6 weeks as well as drive within 3 to 6 weeks. It may take 4 to 6 months or up to an entire year to fully recover as well as realize complete benefits of knee replacement surgery.

After knee replacement surgery, an ice pack is needed to control the swelling and inflammation through vasoconstriction. Putting an ice pack over the knee frequently for the first 48 to 72 hours after knee replacement surgery is recommended by doctors. And for the first week, icing the area two to three times a day is recommended, particularly before going to sleep.

The Thermopeutic Reusable Ice Pack is appropriate for use after knee replacement surgery because its cold temperature will last much longer than other ice packs. It is also provided with a high quality neoprene strap so that it is easy to keep it in place while allowing maximum compression. And there's no need to worry about the non-toxic gel leaking out because it has been placed inside a high-quality leakproof plastic.

People who have tried the Thermopeutic Reusable Ice Pack have mostly positive things to say about it. For instance, Bailey says, "Bought two of this for my recent total knee replacement. My Ortho wants each ice session the first 2-3 weeks for 45 minutes. This lasted longer than that! The Velcro wrap holds it in place. Also very well made. Definitely recommend this."

Howard Shen, co-founder of Thermopeutic, explains the design focus of the product and the mission of the company, "We really focus on fit and comfort on every product. Ultimately our goal is to help you recovery from your pain and injuries as fast as possible so you can get back to your routine."

Those who are interested in the Thermopeutic Reusable Ice Pack can visit their website or their Amazon page, or contact them on the phone or via email.
