New US Banner Flag Launched By BBI Flags

August 10, 2015

August 10, 2015 -
BBI Flags, a flag making business in East Lansing, MI, has launched their new 3' by 5' US flag. This is a banner flag that has been made to slide right onto the pole, without the need for any grommets. It can be hung at either a 90-degree or a 45-degree angle. According to the company, since having been first released, it has been selling quite well.

"We are very proud of the quality of this flag," said Nina Bailey, a BBI Flags spokesperson. "And our customers are already giving us feedback that they love it too."

All flags offered by BBI Flags are fully made in the USA. The US banner flag is made from a nylon-coated material, with the trademark SolarMax, which stops it from fraying and fading, even under the sun. As such, the flag is designed to last in any type of condition. The stripes have been embroidered on the flag and the stars have been sewn on. Furthermore, it has a reinforced fly hem that ensures the ends do not start to fray as quickly as they do on other types of flags.

Since having been released, this US banner flag has already received a number of positive reviews. "Great purchase," says SGOtwo. "I am an American flag type of person - I fly it daily. Arrived very quickly; no negative issues at all with this purchase."

BBI Flags believes in the quality of their products. As such, they have included a 100% manufacturer warranty. While they do not expect anyone to have any complaints about the quality of the flag, they do offer a 60 day, no questions asked money back guarantee for anyone who is not completely satisfied with their purchase.

Besides the US banner flag, BBI also sells a number of other flags and products on Amazon.com. These include a 3' by 5' California Republic flag, and another 3' x 5' US flag. Additionally, they are offering home and kitchen products, including a digital kitchen scale. Since its launch, the company has reported that all products have been positively reviewed and received by customers.
