

Guelph Roofing Company Launches New Website

December 02, 2019

December 02, 2019 - PRESSADVANTAGE -

Turbo Roofing, a company based in Guelph, Ontario, Canada, has announced that they have recently launched their new website. This Guelph roofing company provides affordable roofing services for homeowners in Guelph and surrounding areas. They can provide roof repair or roof replacement for homes and commercial buildings. Their teams are fully licensed and insured to handle all kinds of roof projects, whether small or large.

Nancy Rey, a spokesperson for Turbo Roofing, says, "We're excited to announce the launch of our new website. We hope that we can better serve people, especially those who are looking for roofing services. Our new site has been designed to better inform people about the services that we can provide."

She continues, "Regardless of whether you're looking for a total roof removal and replacement, a little bit of roof refreshment, or even new roof construction, we here at Turbo Roofing can help you! Dedicated to making sure that all our friends and neighbours throughout the Guelph, Ontario have access to professional and reliable roofing solutions, it's a great honour for the people of Guelph to trust us with a critical part of their home."

They can offer roof repair for both residential and commercial buildings. They also provide emergency roof repair, for example, during those times when a storm had caused great damage to the roof and repair must be done as soon as possible to prevent further damage to the home. They suggest that homeowners and building owners have their roofs checked and have it repaired or replaced to avoid emergency situations as much as possible. Those who are interested in knowing the location of Turbo Roofing can check out their Google Maps page at <https://g.page/turboroofing>.

Meanwhile, because the weather in Guelph can get a bit extreme, causing the roofs on the homes and commercial buildings throughout the community to take their fair share of strong winds and bad weather, metal roofing materials are often recommended. Conventional asphalt shingles are likely to show signs of

wear and tear earlier compared to other roofing materials while metal roofs have been observed to last a lifetime. That is why they usually recommend metal roof systems whenever a roof replacement is needed for a particular home or commercial building.

Replacement of an existing roof with metal roofing offers several advantages. First of all, metal is a proven construction material that usually lasts for 50 years or more, outlasting traditional roofing materials by 20 years or more. Second, a metal roof can provide an aesthetically pleasing appearance that can add value to the home. Third, a metal roof offers a substantially increased energy efficiency combined with a lower roof weight on top of the roof framing.

Turbo Roofing offers licensed and insured metal roof repair or replacement services in Guelph and neighbouring areas. They can provide free estimates for homeowners and other property owners who are interested in the service. They can also be called on to conduct roof inspections. Aside from the fact that metal roofs last for 50 years or more and are beautiful to look at, they are also resistant to rot and mildew. And they are also easy to repaint.

Furthermore, Turbo Roofing can also provide flat roofing services in Guelph. Flat roofs are now made of tougher materials, thus providing a roof of greater durability. Another important advantage of flat roofing is that it is easy to spot an issue before it worsens and become a serious problem. With their expert team, they are able to ably install or repair flat roofing.

Previous customers of Turbo Roofing have left very positive testimonials to show their appreciation for the quality roof work that was provided to them. For instance, Dipu Tha K. said, "Before we bought our house a few months ago, we had Ryan come out and inspect the roof. We needed some maintenance, but nothing too overwhelming. He gave us a reasonable quote, and his crew got out here quickly to do the work. They were quick and thorough. Thanks for the great job."

Those who would like to know more about the Guelph roof repair services provided by Turbo Roofing can visit their website or contact them on the phone or through email.
