

E Bay Is Selling Ticketing Unit Stub Hub for \$4.05 Billion

December 02, 2019

December 02, 2019 - PRESSADVANTAGE -

Sunsella, a business based in Las Vegas, Nevada, that offers home and kitchen products online, comments on the announcement that EBay is selling ticketing marketplace StubHub for \$4.05 billion in cash to ticket reseller Viagogo Ltd. This decision came almost a year after activist investors exerted some pressure on the ecommerce giant to get rid of some its businesses. In January of this year, activist investors Starboard Value and Elliott Management Corp urged Ebay to sell its ticket sales business and eBay Classifieds Group in a plan that would help double the company's value.

After the activist investors had made their request, eBay decided to make changes to its board of directors in March. Later, it announced a review of its eBay Classifieds and StubHub businesses as part of its agreement with the activist investors in an effort to avoid a proxy contest.

Meanwhile, the online marketer of various home and kitchen products has announced the availability of a number of products. One of their products for cooking is a set of four silicone egg rings. These rings are made of high-grade and extra thick silicone and each ring is provided with a stainless steel handle for easy retrieval while cooking. Each ring is reusable and non-stick and it is recommended that it be used on coated

cookware for non-scratch cooking. With these rings, people would be able to make perfectly round fried eggs, pancakes, omelets, burger patties, and more. They are also heat resistant and oven safe, which means they can be placed on a pan, a barbecue grill, a skillet, or a griddle.

Another in-demand product offered by Sunsella that could be useful when cooking for the upcoming holidays is the silicone vegetable steamer. This steamer can easily be made more compact so that it will occupy less space in the drawer or cabinet when not in use. It is made from high grade silicone and its size can be easily adjusted to make it fit inside various sizes of pots and pans. It can withstand heat up to 446 degrees Fahrenheit or 230 degrees Centigrade. It is also provided with durable locking handles that can be conveniently used to easily retrieve it from inside a pot or pan. And the handles can be folded, allowing the lid of the pot or pan to be closed while it's being used for steaming. It can be used to steam different kinds of food like fruits, eggs, dumplings, desserts, vegetables, chicken, meat, seafood, and more.

Also available from Sunsella is a stainless steel vegetable steamer. This is made from 100 percent high-grade stainless steel and it has a creative design that allows its diameter to be easily adjusted so that it can fit different sizes of pots and pans. It can be used to steam different kinds of food, such as dumplings, fruits, eggs, chicken, desserts, vegetables, seafood, meat, etc. It can also be utilized as a container for the steamed vegetables and other foods and it can be easily retrieved from inside a pot or pan using its center ring or extension handle.

Another convenient home product from Sunsella is the Leakproof Lunch Container. These are 100 percent leakproof bento boxes, which means no liquids like soup accidentally leaking out of the box, possibly damaging other items in the bag. It also means that its lid is tight enough to prevent the soup or sauce from going into the other compartments and possibly affecting the other food in the box. This bento box can both be used as a work lunch box or a student's lunch box. It is possible for workers to plan and prepare their lunch for the whole week and keep these boxes in the fridge so that in the morning it would be easy for them to get a box, heat it up, and they're ready to go to work. Parents can also do something similar for their children who go to school.

Those who are interested in any of the Sunsella home and kitchen products can visit their website or contact them on the phone or through email.
