

RGR Abatements Shares Positive Customer Reviews For Calgary, Alberta Asbestos Abatement

December 03, 2019

December 03, 2019 - PRESSADVANTAGE -

Calgary, Alberta based RGR Abatements is celebrating the outstanding positive comments that they have received through Google and other review platforms. The local company has earned a place among the best-rated asbestos removal specialists in the area, having helped thousands of clients remove this toxic material from their homes. More information on the company is available here: <https://rgrabatements.com/>.

For several years, RGR Abatements has been the preferred option for Calgary residents whenever the need for asbestos testing or removal arose. They have been complimented on several occasions for their reliability, commitment to their clients, and the excellence of the services they deliver. The company asserts that their first and foremost priority is always their clients' requirements.

Raj Gosal, a representative of RGR Abatements states, "We are overjoyed with the support we have received from our clients and thankful for the supportive comments that have reached us. Seeing such a positive response from the community regarding our efforts motivates us to keep providing the best service in the area. We also want to reassure them that we read their feedback and consider it when looking for ways to improve our services. The Calgary community can rely on us to provide them with a reliable service of the

highest quality, and they are always welcome to reach out to us with any inquiries."

RGR Abatements possesses several customer reviews that attest to the excellence of their services, which they have accumulated over the course of their work in the field. In one of their most recent testimonials, written on the Google platform, Courtney Read states that they found the company, "Prompt and professional. Raj was happy to answer all my questions by phone and email. They do testing and remediation; however, don't apply any pressure when testing to use their services if tests are positive. The fact that their testing price is very reasonable is great. More people should test and at least know what they are dealing with in their home."

In another customer review, Harry Stone says, "Well, a big shout out to Raj from RGR Abatements. I don't often write reviews but after today's experience, I thought it would be worth mentioning. Raj showed up on time. We talked about the problem and, after diagnosing the problem, he got right down to work. No messing around. Samples were collected quickly and efficiently, and we had the test results within a few days. Incredible service, and the price was below others.?"

Stone continues, "We had some questions and concerns and Raj was quick to respond and give us great feedback and solutions. Melanie in the office was pleasant to deal with and was quick to get us everything we needed. I would recommend RGR Abatement and will definitely be using them for any future work. If possible, I would ask for Raj by name."

In order to ensure both their customers' safety and the proper removal of asbestos within each property, RGR Abatements offers a complete array of services, including RGR Asbestos Calgary Inspection, Testing, and Removal, as well as Vermiculite Removal. All of these services are carried out by licensed, insured, and bonded professionals, ensuring the well-being of all parties involved and reducing the risks of environmental contamination. Their team also uses state of the art equipment, hastening the testing process and facilitating the removal of hazardous material.

Gosal states, "Removing asbestos from a property is not an easy task, and certainly not one that should be carried out by inexperienced personnel. Our team consists entirely of experts who have been instructed on the safety measures necessary to ensure a safe asbestos removal, and we can not emphasize just how important this is. Hiring amateurs for this kind of job can prove catastrophic, as they could expose both you and themselves to the toxic dust released by asbestos. Even if you do not choose us to remove the asbestos in your home, we encourage you to perform thorough research on the qualifications of the company you choose."

More information on the services provided by RGR Abatements can be found on the company's website, including a thorough description of each procedure they use. Furthermore, they invite prospective clients to reach out to Raj Gosal for a free quote. The company's website is available here: <https://rgrabatements.com/asbestos-removal-testing-calgary-edmonton-ab/asbestos-testing/>.
