

A Milton Auto Recycler Recognizes Trends Within the Industry to Share with Their Community

December 02, 2019

December 02, 2019 -

Milton, Fla. ? The auto recycling industry is constantly changing with new trends, opportunities and challenges. With the automobile being one of the most recycled consumer products in the United States, the automotive recycling industry is continuously working to improve the processes and technologies used. A Milton auto recycler is helping to keep their community updated with the newest trends and opportunities within the industry.

According to Butler's Auto, the auto recycling industry has a high demand for end of life vehicles. Once a vehicle reaches the wrecking yard, any reusable parts such as wheels, seats, hoods and doors are removed. Any environmental hazards, including mercury switches and fluids, are also removed. The scrap metal is then broken down and shipped to steel mills where is it recycled into new steel. Because of the high demand, these end of life vehicles incite a fair amount of competition from scrap yard and automotive dealers. With technology advances, customers are now not only able to sell these vehicles directly to auto recyclers, but also through online sites such as Craigslist and eBay.

As with any opportunities within an industry, there also come many challenges. Finding a reasonably priced, end of life vehicle is a challenge for auto recyclers. Many old vehicles are exported while more are purchased by unscrupulous buyers who will pay most any price for them. Another challenge that salvage yards face is finding skilled labor to fill job positions. Recyclers need to ensure that all employees are well-trained and fully competent in the field to prevent the overall business efficiency from diminishing.

Family owned and operated, Butler?s Auto Recycling has served the Milton, Pensacola and surrounding areas for many years as a leader of used car parts in Milton. Their expert team is committed to providing their customers with quality, low-cost auto parts.
