

Daniel Klibanoff Through Multimedia Lists Swings The Door Open To Wireless Data

August 07, 2015

August 07, 2015 - PRESSADVANTAGE -

Daniel Klibanoff announced today that the MultiMediaLists.Com Premium Phone Append processing service now includes access to the largest database of cellular telephone numbers. As cell phone usage increases to replace many landline telephones, it's more important than ever to include cellular numbers in your phone append and verification services.

Multimedia's proprietary in-house software increases phone number accuracy for more effective telemarketing. As indicated by Klibanoff your customer or prospect data is processed against FOUR of the largest telephone databases in the country, and includes our Mobile / Cell Phone Append Process. Klibanoff states, "No other company can touch the volume and quality of our phone append processing."

Multimedia houses all "Do-Not-Call" files (FTC, State Specific and Privacy Advocate) making any campaign compliant across all platforms.

Klibanoff said, "We rent lists of cell phone owners with over 300 demographic, psychographic, and lifestyle behavioral selects available."

For further details contact Daniel Klibanoff at 256-468-5478 or email daniel@multimedialists.com.
