

Softease Announces the Release of Their First Product Offering, The Foot Peel Mask

December 10, 2019

December 10, 2019 -

Softease, a new startup venture out of Alexandria, Virginia is pleased to announce the release of its first product, the Foot Peel Mask. The Softease website with the company's first product offering can be seen here at www.softease.shop.

Spokesperson Peter Miller has this to say about the launch of the company's first product, "Anyone who has ever been involved with starting up a new company knows how much hard work that takes. But they also know how good it feels to offer their first product for sale. That is what everyone here at Softease is feeling now as the fruits of our labor have been rewarded. We are excited about what we think our new product can do for our customers and we hope many people benefit from it. With all the effort that went into making the Softease foot peel mask, we expect it to be a staple product for us well into the future."

Miller said that the new product is very simple to use and targets the foot area. He states that using it is as easy as slipping on a pair of socks. That's because all the foot treatment takes place simply by placing a bootie over each foot. Then the booties are simply worn for 45 to 60 minutes. The customer can even do activities such as watching TV or reading or a book while the booties are applying the product.

He says that everything the customer needs to benefit from the Exfoliant Foot Peel Mask is contained right in the package. Each package includes a set of booties and the special formula that is made to be put on the feet while wearing the booties. Miller also stated that the contents in the package are all quality made from all-natural ingredients. A thorough set of instructions is included in the package too.

Miller also wants people to know that the foot peel mask is a one size fits all product. He clarified this by saying, "The included booties can be made to fit both men and women up to a size 16. That allows both men and women to enjoy using this product. This can be especially beneficial for men. That's because even though men experience the same dry skin problem with their feet that women do, they are much more reluctant to go out in public to get it treated. So many just do nothing about it. Now they have a foot care product they can use from the convenience of their own home. Dry feet problems are not gender-specific, so we made our product that way too. We feel that both men and women will really enjoy using the Exfoliant Foot Peel Mask."

Here are a few early testimonials about the Softease foot peel mask that were left on the company's website. Cheryl wrote, "Loved it! The directions were easy to follow and the foot mask was simple to use too. With these booties, I was able to put my socks and slippers over them and walk around in the house. A few days later, I really liked the impact the product had on my feet and they look much better than before. Will repurchase."

New customer Yonie added this, "Great Product Highly Recommended! I tried out the Softease foot exfoliation to remove some thick skin on the back of my heel. The booties fit my size 7 feet very well. I kept the booties on for one hour and I noticed the effects after two days. It did a great job for me. Would Recommend!"

Miller also said that people can go to the company website to learn more about the Softease foot peel mask. On the homepage, people will also find answers to some of the most frequently asked questions that the company gets about this product. A very good description of the product can also be found on their Amazon listing at
