

Amazon Offers Quantum Computing as a Service

December 13, 2019

December 13, 2019 - PRESSADVANTAGE -

Sunsella, a company based in Las Vegas, Nevada, that offers home and kitchen products online, has commented on the report that Amazon Web Services has introduced a fully managed quantum computing service known as Amazon Braket. This particular service will allow researchers, scientists and developers conduct experiments with computers from various quantum hardware providers, such as IonQ, D-Wave, or Rigetti, in just one place.

With Amazon Braket, users would be able to build and test circuits using a simulation powered by classical computers, and then run them on an actual quantum computer. Users would be able to define a quantum circuit using a single line of code and then run it using another line of code. Braket can be accessed through a notebook-style interface. To ensure better security, Braket has security and encryption placed at each level. For better security, Amazon's implementation of the TLS/SSL protocol, known as s2n, has two different key exchange mechanisms that are resistant to a quantum computer cracking the encryption.

Meanwhile, the online marketer of various home and kitchen products has commented that this development signals the growth of the importance of quantum computing, which could affect e-commerce. One useful product offered by Sunsella online is a set of four silicone egg rings. These are made from high-grade and extra thick silicone. Each ring has a stainless steel handle to make easy to get it out from the pan when

cooking. Each ring is non-stick and reusable and it is suggested that it be used on coated cookware to ensure non-scratch cooking. People would be able to make perfectly round pancakes, omelets, fried eggs, burger patties, and more with these rings. These are heat resistant and oven safe so that they can be placed on a barbecue grill, a skillet, a griddle, or a pan.

Another popular home and kitchen product from Sunsell is the silicone vegetable steamer. This steamer can easily be kept in the drawer or cabinet because it can easily be made more compact. It is made from high grade silicone and because its size can be easily adjusted, it can fit in a wide range of sizes of pots and pans. It can withstand heat as high as 446 degrees Fahrenheit or 230 degrees Centigrade. It also has strong locking handles to be used for easy retrieval from inside a pot or pan. The handles can be folded to allow the lid of the pot or pan to be closed while it's being used for steaming. It can be used to steam different types of food like fruits, eggs, dumplings, desserts, vegetables, chicken, meat, seafood, and more.

Another important product from Sunsell is the Leakproof Lunch Container. These are 100 percent leakproof bento boxes so that soup and other liquids do not leak out of the box, possibly ruining other items inside the bag where it is placed. It also means that the soup or sauce in one compartment cannot seep into the other compartments and possibly affect the other food in the bento box. This bento box can also be used as a work lunch box or as a student's lunch box. Workers can simply plan and prepare their lunch for one week and then keep these boxes in the refrigerator. When they get up in the morning, they will just get one of the boxes from the fridge, heat it up, and then bring the box to work. Something similar can also be done by parents for their kids who go to school.

Another convenient product from Sunsell is their stainless steel vegetable steamer. This is totally made of high-grade stainless steel and it has been designed in such a way that its diameter can easily be adjusted to make it fit a wide range of pots or pans. It can be used to steam different kinds of food, such as fruits, eggs, chicken, dumplings, vegetables, seafood, meat, desserts, etc. It can also be used as a container for the steamed vegetables and other foods and it can be easily retrieved from inside a pot or pan with its center ring or extension handle.

Those who are interested in some of the Sunsell home and kitchen products can visit their website or contact them through the phone or via email.
