

Flaskdata, the Leader in Real-Time Deviation Detection for Clinical Trials, Announces Community Involvement Programs

December 08, 2019

December 08, 2019 - PRESSADVANTAGE -

Modiin, Israel -- Flaskdata.io announces 2 community involvement programs.

Flaskdata.io, the Israeli clinical trials tech company, announced today that the company has become actively involved in 2 community involvement programs. "Community involvement is part of our culture and a cornerstone of our corporate responsibility. We practice what we preach in diversity and encouraging opportunities for young women in STEM education," says Danny Lieberman, founder and CEO of Flaskdata.io.

The company is sponsoring a 7th grade girls robotics team in Modiin. The team of 7 girls are designing an autonomous robot to move objects at home for the elderly. The girls will compete in local Israeli competitions for robotic innovation and hope to reach the national finals in 2020.

In another social initiative, Danny Lieberman will join the board of "My piece of the puzzle", an Israeli NGO founded by Jenna Elbaz and Shaked Karp.

My Piece of the Puzzle is an Israeli non-profit that integrates and empowers 2 highly diverse groups of children: children at risk and children with special needs.

In Israel, these 2 groups are treated separately and not equally and are often left behind in the highly competitive, fast-moving and tech-oriented culture of 21st Century Israel.

Jenna Elbaz talked about the initiative in an interview today. "We use diversity to drive positive outcomes. We get up in the morning with the vision of bringing these 2 groups of children together and improving their individual and collective understanding of each other's challenges and foster their personal growth, social skills and academic performance. We empower children with challenges and help them develop their potential, expand their personal horizons and develop tools for independent living. We are delighted with Danny and Flaskdata.io involvement as it is one more way for us to bridge gaps in Israeli society for Israeli children and high-tech companies."

About Flaskdata.io

The Flaskdata.io platform currently supports studies at over 350 investigatory sites in Europe, United States and Israel. Flaskdata.io works with life science sponsors and CROs to design, implement and operate patient-centric clinical trials. The Flaskdata.io platform integrates continuous data feeds from patients, investigators and connected devices with automated detection and response to protocol violations in real-time. Additionally, the Flaskdata.io "Powered by Flask" program is providing digital therapeutics, digital health and medtech developers with free and open access to the Flask API and reduce their time to market for HIPAA and GDPR-compliant patient management solutions.
