

Softease Foot Peel Mask Answers the Question: How to Get Rid of Dead Skin on Feet

December 10, 2019

December 10, 2019 -

Softease Foot Peel Mask has now answered the question young and old ask of 'how to get rid of dead skin on feet' with their exfoliating foot mask.

As people get older their feet begin to suffer in many different ways. They get tired more easily of course, but the problems do not stop there. The skin gets hard and dry; cracks and callouses appear ? which contributes to painful feet. Foot pain makes it much more difficult to walk, work, play, and relax.

A spokesperson for Softease said, ?Dry dead skin is a very real problem for both men and women and both hate how rough and dry their feet feel. At best it?s an uncomfortable embarrassment and at worst it can be very painful. Young or old, nobody wants hard cracked skin, and nobody likes it. At Softease we want to make it possible for anyone to do something about problem feet.?

It is now possible with the Softease Foot Peel Mask to repair the damage to feet that daily life causes. The mask gently removes dead skin on both heels and toes and helps healthy smooth skin to reappear. Apart from exfoliation, the mask helps moisturize and nourish damaged skin. In addition, the mask helps remove

painful, stubborn callouses.

The mask is for both men and women and is of particular use to anyone who spends most of their day standing or walking. Regular wearers of high heels or sneakers often suffer from rough dead skin and they too can benefit from the mask. Not everyone wants the expense of a pedicure and of course, many are embarrassed by the appearance and feel of their feet and would prefer to treat them in the privacy of their own home.

Janey McCormick, of Atlanta, said in her review, "I just love the results I got from using the foot masks. The directions that came with them were really easy to follow. I didn't really expect to benefit much from them, but I was wrong. After ten days my feet are softer than I would have thought possible."

Most people will see results within seven to fourteen days and those results are achieved without the use of harsh chemicals. The Softease Foot Peel Mask only uses natural, antioxidant-rich ingredients: natural fruit acids including citric acid, malic acid, aloe vera and papain, making it a much safer alternative and suitable for even those with sensitive skin.

The mask is suitable for men and women and can be used by those with feet as small as a size six as well as those blessed with much larger feet. Each pack contains two pairs of foot peel masks in fuss-free packaging.

"People talk about foot care more in the summer," Amy Klein, of Pittsburgh, said "but in the winter, I hate the feeling of dry, scaly feet in my winter socks and my husband teases me that I'm a dragon! These foot peel things worked surprisingly well and despite not knowing how they work ? they make my feet and my husband very happy."

Instead of using messy pumice stones or graters or glopping on thick creams or gels ? using these masks to get rid of dead skin on feet couldn't be simpler. Users put them on their feet for an hour and in a few days the skin just comes off.

Nobody wants to have feet that others would think are ugly. The foot peel mask makes it simpler for everyone to have feet that they are not ashamed of at a price much lower than a visit to a pedicurist or spa.

The Softease Foot Peel Mask is now available for purchase on Amazon. It has already attracted the attention of people wishing to improve the condition of their feet and is beginning to gain a reputation as can be seen through the increasing number of high ratings and the number of positive reviews.
