

Calgary Roof Installation Company Gets a New Five Star Review

December 11, 2019

December 11, 2019 - PRESSADVANTAGE -

No Payne Roofing Inc, based in Calgary, Alberta, Canada, has announced with pride that they have received another five star customer review. This came from Dan T., who observed that the price was reasonable for a new roof for a sizable home with a new skylight, and that the crew were very efficient. The company is fully licensed and insured to offer general roofing services in Calgary and neighbouring areas.

Dan T., in his five star customer review, said, "I would and will recommend No Payne Roofing to anyone who needs a new roof. The quote Mike gave was awesome for the size of my home and with a new skylight as well. The crew arrived on Thursday morning and finished the work on Friday afternoon. After the work was done on Friday I came home to my new roof. I went around my home and you could not tell that anybody was there as they cleaned up so well that I could not find anything left behind from the work they had done. Now every time I come home I love to look at my beautiful new roof as I pull up to my house. Thank you Mike and your crew for the great professional work you have done."

Mike Payne, CEO and founder of No Payne Roofing Inc, says, "I'm delighted to know that Dan's experience was good. We try our best to make every project as painless as possible. It was good to work with Dan and

we can promise our customers that we'll be doing the same for them.?

It should be noted that getting a highly positive No Payne Roofing customer review is nothing new for the company. In fact, in a previous press release, they have reported another five star review because the customer had been amazed at how the company had provided the same attention to detail even when dealing with a relatively minor issue for the roof. And despite being a Thanksgiving weekend, they were able to squeeze in the work for this particular client.

No Payne Roofing Inc offers a wide range of services. These include roofing services, gutter cleaning services, siding repair, chimney repair, and skylights installation. For their roofing services, the company offers roofing inspections, roof maintenance, new roof installation, roof repairs, and roof replacement. The company offers a broad range of residential and commercial roofing services including siding and eaves trough repair, all with full 10-year warranties.

The company also offers gutter cleaning services. While gutters appear to be minor when compared to the roof, they can cause problems if they get clogged, and this occurs quite frequently. They advise homeowners to be on the lookout for signs of a clogged gutter to remedy the problem before it becomes serious. Things to look for include: the presence of ponded water in the gutters; misaligned downspouts; and rusting gutter undersides. It is vital to have a well-maintained gutter system because this can prolong its lifespan, keep the sidings clean, and protect the garden and yard, including the home's foundations.

Another important service offered by No Payne Roofing Inc is siding repair. There are a number of things that homeowners need to be on the lookout for that may indicate that there is siding damage. These include rotting and warping; peeling paint inside the home; a loose or missing panel; increasing energy bills; black stains that could be mold; and rusted metal sidings. The company can offer repair services for various kinds of sidings, including vinyl siding, fibre cement siding, wood siding, composite siding, and metal siding.

Furthermore, the company also offers chimney repair and skylights installation. Chimney repair is very important, particularly with the onset of the winter season. They can offer solutions to various chimney problems like crumbling bricks, leakage, cracked chimney liners, damaged chimney crown, cracked or broken flashing, and more.

Those who are interested in Calgary roof installation and other services can visit the No Payne Roofing Inc website or contact them on the telephone or through email.
