

Poser Tubes Launches Credit Repair Service in Bakersfield California

December 17, 2019

December 17, 2019 - PRESSADVANTAGE -

Poser Tubes Credit Repair has announced that they have recently launched their credit counseling and credit repair service in Bakersfield, California. Their service is for people who need to have their credit fixed because their credit score has taken a hit from a number of possible issues. These include collections accounts, judgments, foreclosures, late payments, charge offs, paid charge offs, bankruptcies, and payments where the amount paid was less than the amount due. They have been serving various cities in California and have recently expanded to Bakersfield. Those who are interested in their exact location in Bakersfield can check out their Google Maps page at <https://maps.google.com/maps?cid=5843609343630807593>.

The city of Bakersfield is the location of the county seat of Kern County. The city has a population of approximately 380,000, which makes it the ninth most populous city in California. Its cost of living is 19 percent lower than the California average but 12 percent higher than the US average. Like in many cities in California, people may face situations that could result in damaging their credit.

Ervin Gay from the Bakersfield office of Poser Tubes Credit Repair says, "With Poser Tubes Credit Repair, our service only charges you when items are removed from your credit report. We'll fix your credit as quickly

as possible, so you can continue with your meaningful life investments.?

The credit repair professionals from Poser Tubes Credit Repair can help people in Bakersfield improve their credit score through the elimination of various negative items found in their credit history. The first step would be to contact the three major credit bureaus and get their clients' credit reports so that these can be checked for any entries that should not be there. If it can be proven to a particular credit bureau that these are truly erroneous entries, these will be removed and immediately result into a better credit score.

Those who have already tried the credit repair service offered by Poser Tubes Credit Repair in California have mostly positive things to say about it. For instance, Jennifer from Bakersfield said, "I needed my credit repaired so I could buy my first house. The team at Poser Tubes removed a bunch of missed credit card payments and other stuff from my credit history. My credit is no longer 'down the tubes'!" Frank from California said, "Poser Tubes cleaned a collections account that was on my credit, and got the debt collectors to stop calling me. My credit has improved, now that this isn't on my record. Thanks again!"

A unique feature of the service offered by Poser Tubes Credit Repair is their "pay per performance" concept. Customers will only need to pay a low monthly amount, while negative items on their credit report are being removed. This is in contrast to other companies that charge significant configuration fees and only file disputes afterwards.

It should also be noted that Poser Tubes operates 100 percent remote, which means that they can help people from anywhere in the United States.

Furthermore, customers will be able to check if there are any improvements in their score. This is because they are provided with a credit reporting dashboard. They will also receive a monthly credit repair progress report, which will show the negative items that have already been eliminated. This report will also indicate those items that are still in the process of being removed and the next steps that will be undertaken in order to improve the client's credit score.

It is important to realize that rebuilding credit can take a long time. Thus, people should not expect overnight improvements to their score. It may take weeks, months or even years, but it does not mean that people will have to wait that long. Some improvements in the score can be noticed within six months to one year.

People who need more information about the credit restoration services offered by Poser Tubes Credit Repair in Bakersfield can visit their website at <http://www.posertubes.com/credit-repair-bakersfield-ca/> or contact them on the telephone or via email. They are open 24 hours, from Monday to Sunday.
