

All Systems Go for Enhanced Roadside Assistance Service in Chicago, IL

December 10, 2019

December 10, 2019 - PRESSADVANTAGE -

Langleys Towing today is launching its enhanced roadside assistance service in Chicago, IL, that will rival other service providers. The company has pledged to deliver a range of service enhancements, including quicker arrival in customer location, faster and better quality of service delivery and more friendly customer-oriented workers.

While there are many tow truck services of similar offerings on the market, what makes Langley's Towing service exceptional is its broad availability. The company has deployed more standby teams in carefully planned locations in the Chicago region which effectively makes it the largest service provider in terms of presence and reach in the Windy City.

Many emergency road companies provide broad service coverage areas in Chicago from Elsdon to Frankfort Square. However, all have failed to effectively provide consistent service to all communities especially in distant and remote areas of the city suburbs. To address this issue, Langleys Towing has added rescue teams in their roster that are strategically positioned to increase their presence and give all communities the service they all equally deserve. Motorists from Equestrian Estates, Oak Forest, Lincolnwood, Highland Hills,

and Hegewisch, among others will no longer wait for more than 30 minutes if they need road assistance. The complete directory of the company's service locations is accessible here: <http://gmbp.in/u/5defa24537336>.

“So many changes await car owners and motorists. Our services will truly be a worthwhile need especially for stranded drivers caught in a bad situation,” says Ken Myers, the official spokesperson of Langleys Towing. “We are transforming our tow rescue teams as a one-stop-shop for people in need of emergency assistance along the road,” he adds.

If people need to jumpstart dead batteries, replace a flat tire, open car lockouts or have someone deliver fuel, oil, water, coolant, and others, Langleys Towing can respond quickly and perform these emergencies. Moreover, their tow mechanics are also capable of performing minor engine and mechanical failures to make a stalled vehicle operable. If worse comes to worst, they can tow a vehicle to the nearest repair shop for more extensive mending. A complete description of their services is available here: <https://sites.google.com/site/langleystowingservices/>.

Myers adds, “To ensure top-notch services all the time, we made our services bonded and insured. All our workers also underwent up-skill training to educate them about the latest techniques and trends about automotive assistance and repair.”

The company has also aspired to provide more customer-centric service to the people. It has achieved this by embracing customers' feedback and frustrations that they gather through their website. Myers explains, “The input provided by the community we serve is critical. We used them to design our strategies and the training of our workers so that we know better how to satisfy their needs and wants.”

Donald Brown, a resident of Mitchells Subdivision and previous customer of the Langleys, exclaims, “The services of Langleys Towing are beyond praise. They repaired my flat tire in minutes and I was able to get to back home safely as if nothing has happened.”

Roadside assistance can also run up quite a tab and many motorists experience difficulty in paying them. Luckily, cheap roadside assistance and towing services in Chicago, IL is now a possibility with Langleys Towing. They have kept their services at the minimum and regularly provided promotional discounts.

“Langleys Towing was born out of a passion to help people. Making our services affordable and honest is the first step in our mission to make the road safer for motorists in Chicago,” says Myers. “What started more than a decade ago as a passion project to help stranded people on the road has evolved into the most comprehensive and most trusted tow truck services in Chicago today,” he added.
