

Derby Razor Blades Now Included With Himalaya Shaving Soap

August 10, 2015

August 10, 2015 - PRESSADVANTAGE -

Men's Soap Company, a men's shaving and grooming company in College Station, TX, has recently started to add a set of five Derby Extra razor blades with their Himalaya shaving soap. Depending on hair growth, these blades can last for between 25 and 30 shaves. The company also sells the blades separately through their own website in packs of five and 100 blades.

Shwan Abdulmajid from Men's Soap Company says: "We felt that the Derby blades are amazing for wet shaving, I use the blades and many of our employees use them as well and we thought it would be great to include a free set for our customers to try them. The blades are very sharp, yet they can be very comfortable to use when combined with our Himalaya Shaving Soap."

The blades are designed to effortlessly glide over the skin, removing every hair in the process. Used in conjunction with the Himalaya shaving soap, this leaves a clean shave without any irritation. The blades are particularly good to use with wet shaves, and the mens shaving soap, made from all natural ingredients, can be used on all skin types, including sensitive skin.

"I have been shaving for almost 60 years," says Franklin. "I've gone through most types of razors, blades and creams/jells/soaps. How many remember the electric hot base you put shaving cream can in? Because of perfume/cologne allergies I have had to use fragrance free products. When I read the unconditional money back guarantee I ordered this product. This soap is the best. No swollen eyes, tears and the closest, most comfortable, smooth shave I have ever had and that includes straight razor barber shaves. After a hot wash cloth on my face and neck this soothing soap makes my double edge glide off the stubble. I actually look forward to shaving, take my time and enjoy the experience."

All products offered by Men's Soap Company, as can be seen on www.menssoapco.com, come with a full money back guarantee. Their customers' happiness is their top priority and they want to ensure everybody is 100% satisfied with any purchase they make.
