Vizual Symphony Launches Newly Designed Website to Improve Client Experience

December 10, 2019

Glendale, California - December 10, 2019 -
Vizual Symphony, Southern California?s audiovisual integration specialists, recently launched a newly designed website to enhance the client experience. The site features an updated, modern look, user-friendly navigation, and resources clients can use to explore the latest audiovisual technology and services.

Meeting Southern California?s organizational audiovisual needs for more than 30 years, Vizual Symphony is dedicated to finding new ways to connect with their clients, which include corporations, municipalities, educational institutions, houses of worship, and museums. The new website will serve as an evergreen resource to keep clients current on the cutting-edge AV technology as well as a place where prospective clients can learn about the services Vizual Symphony provides.

?Vizual Symphony designed the new website with highly valued clients in mind to make their access to education and resources as streamlined as possible,? said Susan Holguin, Vizual Symphony, Inc., CEO. ?As a company that is committed to bringing clients? ideas in focus through optimal technology integration, it seemed only right that the website should feature the best tools and information available.?

Vizual Symphony?s services include four primary areas: video conferencing, digital signage, active learning, and lecture capture. Through the new site, visitors can navigate pages devoted to each service area and learn how the company connects clients with the latest in technology to encourage growth and innovation within their companies and organizations.

Site visitors can also discover what is involved in the process of going from concept to reality with Vizual Symphony services. Other site features include case studies of clients who have utilized the services, informational videos, client reviews, and the ability to schedule a free consultation.

?At Vizual Symphony, it?s a primary goal to educate current clients and prospective clients so they feel confident in the company?s expertise and in the entire VS experience?whether the team is connecting with them online or face-to-face,? stated Holguin. ?The website is now primed and ready to facilitate and nurture the kind of meaningful relationships Vizual Symphony strives to create with each and every client.?
