

## **Finnteriors Construction Services Announces Kitchen Remodeling Trends Are Changing Faster than Expected**

*December 19, 2019*

December 19, 2019 - PRESSADVANTAGE -

Finnteriors Construction Services knows that kitchen remodeling is high on most homeowners' to-do lists and most want the latest sleek and modern designs. The latest trends are, however, changing constantly making it harder for homeowners to keep their ideas up to date. In order to fashionably remodel your kitchen, the services of a professional design and construction company that stays on top of the latest designs will be needed.

Finnteriors is based in the St. Louis, Missouri, area and is a locally owned and operated general contracting business. They have been helping provide construction and remodeling services to customers for over 20 years.

In the United States, kitchen remodeling is one of the most popular projects that a homeowner is likely to undertake. Dream kitchens come in all shapes and sizes of course; sometimes rustic, sometimes modern, and sometimes practically space-age. Whichever is desired, not only is it a major undertaking but it can be

very problematic trying to ensure that the design chosen is on-trend and not behind the times.

What suits one homeowner may not suit the next and a kitchen remodel is one way of getting around this disparity. Times change and people's tastes change with them. What was in fashion even a year ago will almost certainly not be fashionable today. Trends in kitchen remodels are constantly changing and changing faster than many would think. Fininteriors makes a point of keeping on top of them so that the latest designs are always available to their customers.

The kitchen is arguably the most important area in a home. It is a room in which families spend quality time together allowing them to connect. Lifelong memories happen in kitchens.

Having an existing kitchen remodeled makes sense and not just because it becomes a homeowner's dream kitchen. A remodeled kitchen, up to sleek space-age standards, is a good selling point. Ultra-modern is likely to stay in fashion longer than almost any other design. Most homeowners will move at some point and when they choose to do so, a remodeled kitchen is a very good feature.

Remodeling a kitchen also makes sense from a purely practical viewpoint. Having a kitchen remodeled can increase available storage space and make it more functional. In addition, it allows a homeowner to update older model appliances like refrigerators and ovens and fit new ones, such as dishwashers and microwaves.

Felicia Fernsby, a local St. Louis homeowner, said, "I bought my house about ten years ago and the kitchen was old-fashioned even back then. I couldn't make up my mind at first, whether to just give it a facelift or whether to go the whole hog and start from scratch and build a dream kitchen. The dream kitchen won, and I decided on a total remodel. I knew of Fininteriors and got in touch and talked through my ideas with them. I knew what I wanted but wasn't sure if it could be done that way. They started the work and when the kitchen was finished, they had literally brought my dream kitchen to life."

Fininteriors has very experienced kitchen remodelers available to help homeowners whether the project is simply a facelift or a remodel from top to bottom. They have a range of innovative and up-to-date designs that can help upgrade a kitchen or remodel it from the ground up.

Many homeowners decide to go with a simple facelift and just update their existing cabinets, others will choose to have completely new cabinets installed. Other popular kitchen facelift options include replacing the countertops and sometimes it is just the flooring that is replaced. New countertops give a whole new look to an existing kitchen and new flooring can get rid of years of hard wear and tear.

Total remodeling is where Fininteriors Construction Services really come into their own. Because they make a point of staying on top of the latest trends their selection of cupboards, countertops, flooring, islands, and

other kitchen features are always up to date giving homeowners the very latest in fashionable designs.

Finnteriors Construction Services has local, national, and international accreditations, and are full members of many prestigious organizations. Homeowners who are interested in kitchen remodeling can contact Finnteriors Construction Services through their website or by telephone.
