

DML Locksmith Announces New Wylie Texas Location

December 23, 2019

December 23, 2019 - PRESSADVANTAGE -

Dallas area services provider, DML Locksmith Services, just announced they have recently opened a new office in Wylie, TX. The company has been expanding in recent years due to popular demand and their new Wylie office continues that trend. DML offers home, business and car locksmith services.

Company owner David Elhadad had this to say as to why they opened a new service shop in Wylie, "Just last year we opened our DML Locksmith McKinney, Texas location. That's when we started to hear many good things about the nearby Wylie area and how fast it's growing. When we investigated further what was there as far as locksmith services go, we felt it was an area that was underserved. We see this as a good opportunity for us and for those living, working, or transiting through Wylie who find themselves in need of reputable locksmith services. From what we have seen in our short time in the area, we have been a good fit for what the people of Wylie need as far as locksmith services go."

Wylie is a municipality that is located about 25 miles northeast of the Dallas Metro Area and about 15 miles east of the thriving residential area of Plano. It has a population of around 57,000 people. That's 7000 more than it had on their last census just a few short years ago. Elhadad says it's that type of rapid growth that attracted them to the area. It's a community that was founded back in the late 1880's and its original name was "Nickelville". The main attraction at the time of its founding was the area's two railroad crossings. Eventually the city was renamed Wylie. Elhadad says that from what he heard, the city first started to grow because it became a popular bedroom community for the larger Dallas area. Now due to its rapid growth several new businesses have moved into the area.

The new DML Locksmith Wylie office's location is at 2801 East Farm to Market Road, Suite #104. Elhadad says it's a great central location to cover the entire municipality of Wylie from. He says that their company will be offering a wide variety of commercial, residential, and automotive locksmith services out of this location. Elhadad says those in the Wylie area will come to love their fast-responding emergency locksmith services too. These are available 24-hours a day and 365 days a year. He says that includes holiday,

weekend, and even late-night emergency locksmith services.

Other Texas cities that the company has offices in are Allen, Plano, Carrollton, Dallas, McKinney, and Frisco. Each location does offer lock and key services on site but most of the time they will go right to their customers to take care of their home, auto, and business locksmith needs.

In the other cities that DML provides locksmith services for they are very well respected. Sherry R. had this to say about the service she recently received from the company's Allen, Texas location, "I called them late in the day and within 30 minutes they were sitting in my driveway and had my door unlocked. Nice to deal with over the phone and in-person and did not charge me a fortune. Very pleased and will definitely use them again!" Elhadad stated that this is the same type of service that those in and around the Wylie area can expect to get too.

Elhadad went on to say that the DML locksmiths providing service in the area are well-trained master locksmiths. Each of them has proven their trustworthiness too by submitting themselves to a thorough background check before going out into the field and representing DML. Elhadad welcomes anyone in the Wylie, Texas area that has questions about the types of services that they offer to contact them by phone or email.
