

Recently Established Concrete Driveway Contractor Lakewood Now Taking on New Customers

December 30, 2019

December 30, 2019 - PRESSADVANTAGE -

A new concrete driveway repair company, Concrete Driveway Contractor Lakewood, has just started doing business in the Lakewood, Colorado area. They will be specializing in all sorts of driveway centered concrete tasks such as repairs, new installations, and extensions. The company also does concrete stamping for those that want to add a touch of flair to their driveway.

A company spokesperson says this about why they chose to bring their concrete driveway services to Lakewood, "Many people wondered why a new concrete contractor would want to come into the Lakewood area when it already has several of them. It's because we feel we are a concrete company that will be very different from those that are already established here. It all starts with the fact that we are locally owned and operated. We live and work in the Lakewood community and because of that, we guarantee that our customers will get a more personalized experience when they hire us to do concrete work for them. Our reputation is important to us because many of the people that we do work for we will also see in the supermarket and pass by them on the street. We want to be able to look them in the eye and be confident that we took care of their concrete needs the right way."

The spokesperson went on to say that people will also like their very fair pricing. He is confident that they will quickly establish themselves as a contractor that offers some of the lowest prices in the area. They are also willing to put their money where their mouth is. He says they will meet or beat any concrete service quote that is given to someone by a competitor in the area. Concrete Driveway Contractor Lakewood has also pledged to make sure they provide their clients with exceptional customer service. All the concrete work they do is fully satisfaction guaranteed too.

They are also different from other concrete service providers in the area because they specialize in driveway work. For most Lakewood area concrete services this is just a small part of their business, whereas for Concrete Driveway Contractor Lakewood, it is the main focus of their business. That gives them much more driveway specific expertise than what their competitors can offer. The spokesperson went on to say that these are the traits they feel will set them apart from other concrete service providers in the Lakewood area.

The company spokesperson mentions that they are also very proud of the new website that came online in conjunction with the opening of the business. The new Concrete Driveway Contractor Lakewood website can be seen at <https://www.concretedrivewaylakewoodco.com/>. He says they designed it to be both visually appealing and be simple to navigate around. Their website briefly describes all the concrete services that they offer and provides several different ways to contact them. For those that would like a driveway repair or other concrete quote from Concrete Driveway Contractor Lakewood, they can use the quick contact form on the website homepage to do this. An interested party just needs to fill out a few details about them and the concrete project they are interested in doing and the company will quickly get back to them with a quote for that job. He mentioned the new website also features several photos of the concrete work that the company has already completed.

He also talked about how people should not be misled by the fact that they are a new concrete company in the Lakewood area. The spokesperson said that their crews are led by concrete technicians with many years doing that type of work. All their concrete techs have also undergone extensive factory and on the job training before coming onboard with Concrete Driveway Contractor Lakewood. He says their concrete crews are just as talented as the crews that are working for the more established concrete driveway services in the area.

Those that wish to know more about this new concrete company and the different concrete services that they offer can call them, visit their website or refer to their Facebook page.
