## **Blessed Towing Roadside Assistance Service In Detroit, MI Gets Better Than Ever**

*December 20, 2019*

December 20, 2019 - PRESSADVANTAGE -

Blessed Towing leads the charge in setting the standards for core automotive services by refining its emergency roadside assistance service in Detroit, MI, and its nearby areas. The company has taken the initiative to set the bar for tow services in recognition of the central role of Detroit at the historic heart of the American automotive industry. The company representative, Steffan Knight, says, "We are continuing to push and raise the bar every single day in the performance of roadside assistance services for the benefit of the people of Motor city and to set the standards for others to follow."

The improved roadside assistance featured faster performance/ delivery of services, operational simplicity, and costs optimization. In terms of fast service delivery, the experienced and licensed workers of the company further undergone intensive training to upgrade their skills. This allows them to update their technical knowledge and abilities to better tackle different roadside emergency problems. Aside from the customary services like battery jumpstart, tire change, and car lockout assistance, workers can now also perform simple mechanical engine troubleshoots. However, customers can still opt to have their stalled vehicles hauled to the nearest auto shops for extensive repair if necessary.

Operational simplicity further helps accelerate service delivery of roadside assistance. The company has developed optimal procedures to quickly evaluate an automobile, identify its mechanical or engine problems and conduct the necessary fix. New equipment and tools were purchased to help workers perform their jobs more efficiency as well. Knight explains, "Evaluating and determining car problems can take time if not systematically performed. This is one area that we have addressed so that we can quickly decide to immediately and effectively fix a car or simply tow it to a mechanic." He further noted that their services are bonded and insured to protect the customer against property damages and substandard services. For a complete list of their services, interested customers can visit this link: <http://gmbp.in/u/5d700bd0db2be>.

The newly improved service includes an increased service reach. The company has worked to build up its presence particularly in far-flung and underserved areas in Detroit. By adding stand-by teams deployed in more locations, tow rescue workers can get to customers at faster rates. Among the neighborhoods where the company has intensified its service reach included Warren, Dearborn, Shores, Ferndale, and Ecorse. Driving residents and visitors in the districts can expect genuine 30 minute response time from the tow provider for emergency roadside help. The complete directory of their service areas can be accessed here: <https://sites.google.com/site/blessedtowing-service48207/>.

Another operational reform that the company undertook is genuine round-the-clock services. As the indisputable front-runner in towing and roadside assistance, the company has made its operations and services open from 7 in the morning to 7 am in the next day every day. Additional staff was hired to make 24-7 operations feasible. Some companies' 24-hour operations are limited to certain areas. Blessed towing makes its services available 24-7 across all its service areas in the Detroit region.

All the services provided by the towing company are characterized by better customer experience. The organization has designed its services and trained its workers to be friendly, warm and welcoming to achieve better customer experience. Knight says, "The greatest way to win the hearts of customers is to provide them with a delightful experience in all our services." From customer agents and dispatchers to towing technicians and billers/cashiers, customers will experience a high level of hospitality and pleasantness.

Finally, Blessed Towing was founded on honesty, integrity hard work, and unsurpassed customer service. The organization had since pride itself on providing its services at an affordable price, which has been one of the major reasons that kept it as the most sought-after towing company in Detroit for decades. There are no hidden fees or add-on charges to its services. They don't make needless services to customers. Knight challenges customers to shop, canvass and compare their service rates against other service providers. "We want Blessed Towing to be a blessing to stranded customers in need of help," he adds.
