

Invisalign Braces In Coventry At Low Cost By Light Lane Dental Practice

January 06, 2020

COVENTRY, UK - January 06, 2020 - PRESSADVANTAGE -

Coventry based dental clinic Light Lane Dental Practice is pleased to announce that they are offering Invisalign dental braces for people of all ages, from young teens to adults. Learn more about the dental clinic at the following link: <http://lightlanedental.co.uk/>.

Dr. Chetan Mathias, Principal Dentist at Light Lane Dental Practice, says, "A person's smile is a very important component of their personality. Whether you're an adult or a teen, you no doubt want to get it fixed if there is a dental issue causing problems for your smile. The way it used to be, dental braces were your only option but that's not the case anymore. With Invisalign aligners, you can get to work on fixing your smile without the social stigma that is sometimes unfortunately associated with traditional braces."

The Invisalign aligners, sometimes referred to as clear aligners, are orthodontic near-invisible devices that are custom made for each patient. They work by slowly moving and adjusting teeth into the desired position. Given that the Invisalign aligners are nearly invisible when worn over the teeth, they are preferred by both adults and teenagers due to the fact that they do not draw unwanted attention.

According to Light Lane Dental Practice, Invisalign aligner treatments usually require that an experienced dentist or an orthodontist take a mould of the patient's teeth. More advanced cosmetic dental practices like Light Lane, however, use a digital imaging system which can be deployed to create a digital teeth scan. With the assistance of other unique computer software created by Invisalign, Light Lane can also preview stages between the current and desired teeth positions, which allows them to determine the set of Invisalign aligners that are created for each stage of the treatment.

The dental clinic says that the duration of Invisalign treatments depends on the severity of the issue at the beginning. On average, the treatment takes about as long as it would with the traditional metal braces and, the more severe the issue, the longer it will take. The clinic recommends that each aligner should be worn for

at least 20 hours a day for two weeks. These aligners will slowly move the teeth into the desired position that has been agreed between the orthodontist and the patient. Those who want to learn more about Invisalign services offered by Light Lane Dental Practice can find more information at the following link: <http://www.lightlanedental.co.uk/cosmetic-dentistry/invisalign>.

The invaluable services provided by Light Lane Dental Practice have earned the clinic a place in the local community's hearts. On Google, they have a rating of 4.3 out of 5 stars. In a recent 5-Star review, Clare B. says, "My mum is 95 and has dementia. She has attended Light Lane for many years. We find the staff extremely polite and helpful. The dentist is respectful and always explains exactly what he will do. He takes the time to ensure that my mum is caused the least distress by her visits. There is disabled parking, which is invaluable. We would recommend this practice."

In another review, Adam Barns says, "It's the best dentist I've ever been to in my life! Not only were all of the staff relaxed and easy to get along with but from the minute you get in the door, they make you feel like your comfort is their top priority. The dentist I saw had the best bedside manner I have ever seen in a medical professional and, literally any questions I had, they endeavoured to try and answer it. My childhood dentist may have given me sugar free lollipops, but these guys gave me the best and most professional service I could have hoped for. You can't ask for better. All on the NHS too. Just brilliant." More reviews, along with more information about the clinic, can be found at the following link: <http://g.page/lightlanedental>.

Those who want to learn more about Light Lane Dental Practice and the various services they provide can find more information on the clinic's website. Additionally, the dental clinic encourages interested parties to get in touch with Sharon Ashton directly via email, phone or, alternatively, the contact form on their website. Light Lane Dental Practice also maintains a presence on Facebook where they frequently post updates, share blog posts, and communicate with their patients.
