

Green Tree Recreational and Medical Dispensary Announces New Product Additions

January 03, 2020

January 03, 2020 - PRESSADVANTAGE -

Green Tree Boulder Recreational and Medical Dispensary has announced that new additions are now available in all its stores. Added to an already comprehensive range of products, these latest editions expand that available selection to offer a greater choice of potency to both medical and recreational users.

Green Tree Medicinals has always made sure that its products are competitively priced, and even though these new additions offer a greater degree of potency, they too are priced affordably. With its current expansion of products, Green Tree's recreational offerings are now wide and varied. Edibles, extracts, and flowers are there as might be expected but pre-rolls, vapes, topicals and tinctures are also options. Even hybrid seeds are available for those who wish to grow their own.

Abigail S., one of Green Tree's newest recreational customers, said, "I love Green Tree's website which is how I first found them. It let me narrow my choice down to exactly what I wanted because it allowed me to search by THC potency. I found exactly what I was looking for and at a good price."

Green Tree Medicinals' website does indeed allow selection by THC potency and a selection of products ranging from 0% to 29% THC potency are available. CBD potency can also be used to drill down as can plant lineage. A half gram and a gram can be purchased with one eighth, one quarter, one half and a full ounce also being available options.

It is not just the recreational side of Green Tree that has benefited from an increase of choice. The company's medicinal cannabis section has also been improved with a wider selection. Available in all the same weights as recreational cannabis, the products include edible, flower, pre-rolls, extracts, and topicals. THC potency and lineage are still available to help find a specific choice.

In some ways customers wanting cannabis for medicinal purposes have to be more selective than recreational users because the aim is to relieve symptoms and pain. Whereas recreational users may find that almost any product will produce the effect they are looking for, that is not the case for medicinal users.

Debra L, a medicinal user said, "I have to balance my cannabis with other pharmaceuticals and with the work that I do. I found that only one strain worked to keep my symptoms under control enough that I can function. But this is not as simple as it sounds. Topicals don't work for me and I didn't like the idea of smoking so Green Tree suggested I try edibles instead."

Green Tree Medicinals understands this problem and will always take the time and make the effort to find just the right product to help a medicinal customer. Its knowledgeable staff are helpful and always willing to make recommendations based on a customer's needs.

Green Tree Medicinals is a family owned and operated company and was originally founded in October of 2009 in Boulder, Colorado. Since its inception, the company has been growing affordable, and premium quality medical cannabis as licensed by the State of Colorado with the passing of Amendment 20 of the Colorado State Constitution. With the passing of Amendment 64 of the Colorado State Constitution in 2012, Green Tree Medicinals could additionally offer recreational cannabis.

A spokesperson for Green Tree Medicinals said, "All the products we have are completely natural, and they're all are soil grown. What this means is that we can offer our customers, both patients and recreational users, top shelf marijuana. We do our very best to achieve consistency, purity, and strength in all our products."

Green Tree stands behind all its products and its declared mission on its website is to fully understand the unique requirements of each and every customer. Furthermore, they want to provide both medical and recreational customers with a positive experience in a welcoming environment.

Green Tree Medicinals has four Front Range locations: Berthoud, Longmont, Northglenn, and lastly the store with the longest opening hours, Boulder, directions to which can be found here <https://www.google.com/maps?cid=9965492765637798680>.
