

Bio Clean of Utah Performs Sewage Cleanup Job in West Valley Utah

January 07, 2020

January 07, 2020 - PRESSADVANTAGE -

Bio Clean of Utah, based in Centerville, Utah, has announced that they are currently doing a sewage cleanup job in West Valley, Utah. The problem was sewage backup in a recreational vehicle (RV)/camping trailer. The customer had called up Bio Clean of Utah to clean up the sewage backup in an RV that was parked outside of a home. The occupants have been living in the RV and taking care of an elderly woman in the home the RV was parked next to. Minimal mitigation was performed as the call to the company was done late at night. The sewage cleanup West Valley Utah job is currently ongoing.

Daryl Olsen, president of Bio Clean of Utah, says, "Sewage backup is truly a difficult situation. Sewage contains biohazardous substances that are dangerous for people. Improper handling of infectious waste is very dangerous to the health of the people living in the surroundings. There are serious, life-threatening risks, such as HIV/AIDS and hepatitis involved if you attempt a clean-up on your own. And there are strict governmental restrictions involving the cleanup and disposal of bio-hazardous waste. OSHA forbids the clean-up of these disasters by untrained personnel."

Sewage backup cleanup is an unpleasant, difficult, and risky task. Thus, it is important to call for professional

assistance for such a cleanup, which was what the customer in West Valley had done.

Aside from sewage cleanup services, Bio Clean of Utah offers other services, such as air duct cleaning, blood and crime scene cleanup, fire and smoke damage cleanup, mold inspection, mold removal, mold testing, and water damage cleanup. The company has been cleaning air ducts for more than 15 years. Over time, the air ducts accumulate dirt, pollen, debris, dust, dander, hair, and more. This accumulation can interfere with household cleaning activities and can even have negative effects on the health of the home's residents.

Bio Clean of Utah also offers trauma scene and biohazard cleaning. Whether there is a trauma scene, suicide, unattended death, crime scene, an accident, or an unsanitary dwelling, they can offer a professional cleanup service. Emotional and psychological trauma is another concern from exposure to blood or body fluids. The company is ready to handle all of these situations discretely and professionally. It should also be noted that most cleanups may be reimbursed by insurance.

Another cleanup service offered is fire and smoke damage cleanup. They want to point out that fire damage is a serious situation and need to be addressed immediately. There is not only fire damage but there is also water damage and smoke soot damage. This situation is also a complex situation because there are various types of smoke. Smoke is highly acidic and can cause permanent damage to many surfaces if it is not cleaned up as soon as possible.

Mold inspection services are also provided by Bio Clean of Utah to find out if a particular home or building has a mold problem. People who notice some stains and a musty or earthy smell, it may be a good idea to request for mold inspection. Bio Clean of Utah also offers mold testing. The company has experienced inspectors who are certified professionals in mold testing.

And if mold is indeed detected, the company offers mold cleanup and removal. Mold has to be removed because they produce irritants and allergens that can affect people who are susceptible to suffering from symptoms of hay fever, such as runny nose, sneezing, irritated eyes, skin rashes, and various throat, nose and lung diseases.

And finally, Bio Clean of Utah offers various water damage cleanup services. These include flooded basement cleanup, pipe leak cleanup, ice damming cleanup, and wet carpet cleanup.

Those who are interested in the cleanup services offered by Bio Clean of Utah can check out their website, or contact them on the telephone or via email. They provide their services to a number of places in Utah, such

as Layton, Centerville, Ogden, Salt Lake City, Provo, Park City, Sandy, Roy, and Tooele.
