

Bio Clean of Utah Conducts Bio Hazard Cleanup in Salt Lake City

January 07, 2020

January 07, 2020 - PRESSADVANTAGE -

Bio Clean of Utah, based in Centerville, Utah, has announced that they had performed a bio hazard cleanup for an auto auction shop, specifically for the cleanup of a camping trailer that was repossessed. Apparently, the owners of the camping trailer had abandoned the trailer when it was reposed. It was found that the trailer contained used drug paraphernalia and needles. The situation called for the bio hazard cleaning, which is aimed at preventing people from getting exposed to blood or body fluids that are biohazard risk, thus calling for a bio-hazard cleanup Salt Lake City job.

Daryl Olsen, president of Bio Clean of Utah, says, "Bio Clean of Utah is prepared to handle all of these situations for you professionally and discreetly. Most cleanups may be reimbursed by insurance, call us for a consultation. There are always special considerations when handling bio-hazard clean-up. The presence of infectious waste is highly probable and clean-up must be thorough in order to prevent the spread of disease. Our professional specialized cleaning crews can insure that all necessary safety measures are taken."

Bio Clean of Utah also offers fire and smoke damage cleanup services. They want to point out that fire damage is a difficult and complex situation and people need to have it taken care of immediately. There is not

only fire damage but there is also water damage and smoke soot damage. There are also various kinds of smoke and have to be considered. These include dry smoke, wet smoke, protein, fuel oil soot, and other types. Wet smoke is smeary and sticky and quite hard to clean. Protein is virtually invisible but it can discolor paints. Other type include fire extinguisher residue.

Bio Clean of Utah also offers other services, such as blood and crime scene cleanup, mold inspection, air duct cleaning, mold testing, water damage cleanup, and mold removal. The company has been providing cleaning services for air ducts for over 15 years. Over time, inside the air ducts can be found an accumulation of dirt, debris, dust, pollen, hair, dander, and more. This accumulation of dust, dirt and other things can blown by the HVAC system so that they are circulated along with the air, possibly affecting the health of the home's residents. It could also be irksome because people have just cleaned but will find that everything has become dusty again. Professional air duct cleaning can provide the solution for such situations.

Meanwhile, mold can be a problem in homes and buildings. That is why Bio Clean of Utah offers mold inspection services to determine whether a particular home or building has a mold problem. People may notice some signs of the presence of mold, such as stains and a musty odor, particularly in damp and warm areas. The company will perform mold testing through its experienced inspectors who are certified professionals. In the event that mold is detected, Bio Clean of Utah can perform mold cleanup and removal if requested. It is necessary to get rid of mold because mold produces spores that easily get airborne and can be allergens or irritants for a number of people. It can cause people to suffer from symptoms of hay fever like runny nose, sneezing, skin rashes, irritated eyes, and a number of nose, throat and lung illnesses.

They can also offer water damage cleanup services, including for a flooded basement. A flooded basement can be quite a problem as it can lead to other damages and even to mold growth. Water is removed by using water pumps and/or related equipment. Then, the next step is to check the various furniture for damage, including the carpet padding. All of these have to be dried and checked for the presence of mold.

People who are interested in the professional cleanup services provide by Bio Clean of Utah can visit their website, or contact them through the telephone or email. They provide their services to various locations in Utah, such as Centerville, Ogden, Layton, Provo, Park City, Salt Lake City, Roy, Tooele, and Sandy.
